SUPPLEMENTARY INFORMATION:

I. Abstract

The National Aeronautics and Space Administration seeks to collect information from members of the public to plan, conduct, and register participants and volunteers for the NASA Human Exploration Rover Challenge, which supports science, technology, engineering, or mathematics (STEM) education. This engineering design challenge focuses on NASA's current plans to explore planets, moons, asteroids, and comets—all members of the solar system family. The challenge will focus on designing, constructing and testing technologies for mobility devices to perform in these different environments, and it will provide valuable experiences that engage students in the technologies and concepts that will be needed in future exploration missions. NASA collects the minimum information necessary from teams, participants, and volunteers to plan and conduct the event.

II. Method of Collection
