SUPPLEMENTARY INFORMATION:**A. Purpose**

Subpart 27.4, Rights in Data and Copyrights is a regulation which concerns the rights of the Government and contractors with whom the Government contracts, regarding the use, reproduction, and disclosure of information developed under such contracts. The delineation of such rights is necessary in order to protect the contractor's rights to not disclose proprietary data, and to insure that data developed with public funds is available to the public.

The information collection burdens and recordkeeping requirements included in this regulation fall into the following four categories:

(a) A provision which is to be included in solicitations where the offeror would identify any proprietary data it would use during contract performance, in order that the contracting officer might ascertain if such proprietary data should be delivered.

(b) Contract provisions which, in unusual circumstances, would be included in a contract and require a contractor to deliver proprietary data to the Government for use in evaluating work results, or is software to be used in a Government computer. These situations would arise only when the very nature of the contractor's work is comprised of limited rights data or restricted computer software and if the Government would need to see that data in order to determine the extent of the work.

(c) A technical data certification for major systems, which requires the contractor to certify that the data delivered under the contract is complete, accurate and compliant with the requirements of the contract. As this provision is for major systems only, and few civilian agencies have such major systems, only about 30 contracts should require this certification.

(d) The Additional Data Requirements clause, which is to be included in all

contracts for experimental, developmental, research, or demonstration work (other than basic or applied research to be performed solely by a university or college where the contract amount will be \$500,000 or less). The clause requires that the contractor keep all data first produced in the performance of the contract for a period of three years from the final acceptance of all items delivered under the contract. Much of this data will be in the form of deliverables provided to the Government under the contract (final report, drawings, specifications, etc.). Some data, however, will be in the form of computations, preliminary data, records of experiments, etc., and these will be the data that will be required to be kept over and above the deliverables. The purpose of such recordkeeping requirements is to insure that the Government can fully evaluate the research in order to ascertain future activities and to insure that the research was completed and fully reported, as well as to give the public an opportunity to assess the research results and secure any additional information. All data covered by this clause is unlimited rights data paid for by the Government.

Paragraph (d) of the Rights in Data—General clause (52.227.14) outlines a procedure whereby a contracting officer can challenge restrictive markings on data delivered. Under civilian agency contracts, limited rights data or restricted computer software is rarely, if ever, delivered to the Government. Therefore, there may rarely be any challenges. Thus, there is no burden on the public.

SUPPLEMENTARY INFORMATION:

A. Purpose

Part 28 of the Federal Acquisition Regulation (FAR) contains guidance related to insuring against damages under Federal contracts (e.g., bonds, bid guarantees, etc.). Part 52 contains the corresponding provisions and clauses. These collectively implement the statutory requirement for Federal contractors to report payment bonds under construction contracts subject to 40 U.S.C. chapter 31, subchapter III, Bonds.

This information collection is mandated by Section 806 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Pub. L. 102-190), as amended by Section 2091 of the Federal Acquisition Streamlining Act of 1994 (Pub. L. 103-335). The clause at 52.228-12, Prospective Subcontractor Requests for Bonds, implements Section 806(a)(3) of Public Law 102-190, as amended, which states that, upon the request of a prospective subcontractor or supplier offering to furnish labor or material under a construction contract for which a payment bond has been furnished pursuant to 40 U.S.C. 31, the contractor shall promptly provide a copy of such payment bond to the requestor.

Given that payment bonds, in conjunction with performance bonds, are used to secure the contractor's obligations, thereby assuring that payments are made to subcontractors and vendors under the contract, the requester will use information on

payment bonds to determine whether to engage in business with that prime contractor.

B. Annual Reporting Burden

Number of Respondents: 4,444.
Responses per Respondent: 2.5.
Total Annual Responses: 11,110.
Hours per Response: .34.
Total Burden Hours: 3,777.
Frequency: On occasion.

Affected Public: Construction prime contractors.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202-501-4755.
