Certain Cold-Rolled Steel Flat Products From Japan: Initiation and Preliminary Results of Changed Circumstances Review, and Intent To Revoke Order in Part

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the “Department”) has initiated a changed circumstances review of, and is preliminarily revoking, in part, the antidumping duty (“AD”) order on certain cold-rolled steel flat products from Japan with respect to certain light gage cold-rolled flat-rolled steel for porcelain enameling meeting the requirements of ASTM A424 Type 1. The Department invites interested parties to comment on these preliminary results.

DATES: Effective January 4, 2017.

FOR FURTHER INFORMATION CONTACT: Robert Bolling, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-3434.

SUPPLEMENTARY INFORMATION:

Background

On July 14, 2016, the Department published an AD order on certain cold-rolled steel flat products from Japan.¹

On November 14, 2016, members of the domestic cold-rolled steel industry, ArcelorMittal USA LLC, AK Steel Corporation, Nucor Corporation, Steel Dynamics Inc., and United States Steel Corporation (collectively, “domestic

producers” or “Petitioners”²), requested that the Department conduct a changed circumstances review, to revoke, in part, the AD order on certain cold-rolled steel flat products from Japan with respect to certain light gage cold-rolled flat-rolled steel for porcelain enameling meeting the requirements of ASTM A424 Type 1. We did not receive comments from any other party.

Scope of the Order

The products covered by this order are certain cold-rolled (coldreduced), flat-rolled steel products, whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement (“width”) of 12.7 mm or greater, regardless of form of coil (*e.g.*, in successively superimposed layers, spirally oscillating, etc.). The products covered also include products not in coils (*e.g.*, in straight lengths) of a thickness less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products covered also include products not in coils (*e.g.*, in straight lengths) of a thickness of 4.75 mm or more and a width exceeding 150 mm and measuring at least twice the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross section where such cross-section is achieved subsequent to the rolling process, *i.e.*, products which have been “worked after rolling” (*e.g.*, products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above, and

(2) where the width and thickness vary for a specific product (*e.g.*, the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, etc.), the measurement at its greatest width or thickness applies.
