

P25 CAP compliance under OMB Control No. 1640-0015.¹

(2) In the event that field experience reveals that a transceiver is not interoperable, the Commission may require the manufacturer thereof to provide evidence of compliance with § 90.548.

The modified rules provide a benefit to public safety licensees by ensuring that only equipment that has been tested for interoperability in a vendor-neutral environment before equipment can be marketed or sold to public safety. This will provide the additional benefit of engendering competition in the public safety equipment marketplace by eliminating system compatibility as a gating factor when evaluating equipment purchases. The *Order on Reconsideration* reduces the burden on equipment manufacturers by allowing them to meet this standard by demonstrating compliance with the P25 CAP or manufacturers' interoperability testing protocol. Compliance with the P25 CAP program is already a requisite for grant eligibility and agency purchasing standards, consequently any new burden imposed by this requirement would be minimal.

Federal Communications Commission.
