

foreclosure crisis, homes in the city's predominantly minority working class neighborhoods that were previously family-owned have been purchased in foreclosure by slumlords and these neighborhoods are now the victims of predatory rental and eviction practices. The commenter stated that the city did not update its AI for approximately 20 years (although it finally completed an AI this year).

Another commenter requested notification from HUD when AFFH documents are published that impact local governments.

HUD Response: HUD appreciates the commenters' suggestions. HUD reviewed the case law cited by the commenter and has concluded that the cases are not applicable to the obligation to affirmatively further fair housing under the Fair Housing Act and under the AFFH rule. HUD continues to assert that the AFFH rule and the Assessment Tool implementing the requirements contained in the regulation will better facilitate compliance with the AFFH mandate under the Fair Housing Act.

In response to concerns raised regarding predatory lending and other single family and mortgage-related comments, HUD notes that these issues can be addressed in several ways in the existing Assessment Tool. The segregation section provides for an analysis of owner-occupied and rental housing, by location. The contributing factors that can be considered under this section include Private Discrimination, Lending Practices and Access to Financial Services. Issues raised by commenters related to landlord tenant and eviction policies and practices can likewise be considered, including through changes that HUD has made to the Assessment Tool in the final stage, for instance in the contributing factor on Private Discrimination.

III. Summary

In issuing this Local Government Assessment Tool, approved for renewal under the Paperwork Reduction Act, HUD has strived to reach the appropriate balance in having program participants produce a meaningful assessment of fair housing that carefully considers barriers to fair housing choice and accessing opportunity and how such barriers can be overcome in respective jurisdictions and regions without being unduly burdensome. HUD has further committed to addressing program participant burden by providing data, guidance, and technical assistance, and such assistance will occur throughout the AFH process. While HUD is not specifically soliciting comment for

another prescribed period, HUD welcomes feedback from HUD grantees that use this tool on their experience with this tool.

SUPPLEMENTARY INFORMATION:

Background

The Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), prohibits certain activities with endangered and threatened species unless the activities are specifically authorized by a Federal permit. The ESA and our implementing regulations in part 17 of title 50 of the Code of Federal Regulations (CFR) provide for the issuance of such permits and require that we invite public comment before issuing permits for activities involving endangered species.

A permit granted by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with U.S. endangered or threatened species for scientific purposes, enhancement of propagation or survival, or interstate commerce (the latter only in the event that it facilitates scientific purposes or enhancement of propagation or survival). Our regulations implementing section 10(a)(1)(A) of the ESA for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.
