

evaluation (Long-Term Evaluation) three months after training. A subset of 1,590 is expected to volunteer to complete the Post-Course Evaluation, and a smaller subset of 519 is expected to volunteer to complete the Long-Term Evaluation. The total burden hours for this request is 416 hours compared to the originally approved 617 burden hours.

The 3-minute NNPTC HPAT provides an efficient online registration process for all PTCs and takes two minutes less to complete than the previously approved version. The 14 evaluation

instruments vary in number of questions based on the intensity of the training. Time to complete the different evaluation instruments ranges from 2 minutes for a one-hour training to 16 minutes for a multi-day training. Burden is calculated for each instrument separately based on number of respondents and number of questions in each instrument.

There are no costs to respondents other than their time. The estimated annualized burden hours for this data collection are 416 hours as compared to

617 for the previous approval. This reduction in burden is due to the shorter time needed to complete the HPAT (3 minutes versus the previously approved 5 minutes) and the smaller number of estimated respondents (4,500 versus 7,400) since there are now fewer PTCs conducting training. This savings for the HPAT burden is greater than the additional burden created by adding 14 new evaluation instruments since only a subset of the 4,500 respondents will complete the post-course evaluation and 90-day long-term evaluation.
