SUPPLEMENTARY INFORMATION:

Agenda

The agenda for the following five hearings and Webinar are as follows: Council staff will brief the public on the results of the gray *triggerfish* stock assessment and rebuilding status. Council staff will also provide an overview of the actions and alternatives considered in the amendment including the Council preferred alternatives. The Council is currently considering modifications to: The rebuilding time period, commercial and recreational annual catch limits (ACLs) and annual catch targets (ACTs), recreational management measures including modifications to the fixed closed seasons, and bag limit and minimum

size limits. The Council is also considering modifying the commercial trip limit while maintaining the current fixed closed season of June 1, 2017 through July 31, 2017. Staff and a Council member will be available to answer any questions and the public will have the opportunity to provide testimony on the amendment and other related testimony.

The schedule is as follows:

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the

following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).
Title: Statement of Financial Interests, Regional Fishery Management Councils.

OMB Control Number: 0648–0192.

Form Number(s): NOAA88–195.

Type of Request: Regular (revision and extension of a currently approved information collection).

Number of Respondents: 330.

Average Hours per Response: 45 minutes.

Burden Hours: 247 hours.

Needs and Uses: This request is for revision and extension of a current information collection. The Magnuson-Stevens Fishery Conservation and Management Act (Magnuson Stevens Act) authorizes the establishment of Regional Fishery Management Councils to exercise sound judgment in the stewardship of fishery resources through the preparation, monitoring, and revision of such fishery management plans under circumstances (a) which will enable the States, the fishing industry, consumers, environmental organizations, and other interested persons to participate in the development of such plans, and (b) which take into account the social and economic needs of fishermen and dependent communities.

Section 302(j) of the Magnuson-Stevens Act requires that Council members appointed by the Secretary, Scientific and Statistical Committee (SSC) members appointed by a Council under Section 302(g)(1), or individuals nominated by the Governor of a State for possible appointment as a Council member, disclose their financial interest in any Council fishery. These interests include harvesting, processing, lobbying, advocacy, or marketing activity that is being, or will be, undertaken within any fishery over which the Council concerned has jurisdiction, or with respect to an individual or organization with a financial interest in such activity. The authority to require this information and reporting and filing requirements has not changed. Revision: NOAA Fisheries is in the process of conducting minor revisions to the form by adding clearer instructions and clarifying some of the questions asked to ensure the questions are consistent with the regulatory requirements. Revisions will also include a specific check box to indicate that a Council nominee, and not a member, is completing the form.

The Secretary is required to submit an annual report to Congress on action

taken by the Secretary and the Councils to implement the disclosure of financial interest and recusal requirements, including identification of any conflict of interest problems with respect to the Councils and SSCs and recommendations for addressing any such problems.

The Act further provides that a member shall not vote on a Council decision that would have a significant and predictable effect on a financial interest if there is a close causal link between the Council decision and an expected and substantially disproportionate benefit to the financial interest of the affected individual relative to the financial interest of other participants in the same gear type or sector of the fishery. However, an affected individual who is declared ineligible to vote on a Council action may participate in Council deliberations relating to the decision after notifying the Council of his/her recusal and identifying the financial interest that would be affected.

The form has been revised to increase clarity for the respondents. No new information is being requested.

Affected Public: Individuals or households.

Frequency: Annually or updated as needed.

Respondent's Obligation: Mandatory.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395–5806.

Dated: February 10, 2017.

NOAA PRA Clearance Officer.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Alaska Region Gear Identification.

OMB Control Number: 0648–0353.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 988.

Average Hours per Response: Tag requests and replacements, 15 minutes; buoy marking, 15 minutes per buoy.

Burden Hours: 1,841.

Needs and Uses: Regulations specify that all hook-and-line, longline pot, and pot-and-line marker buoys carried on board or used by any vessel must be marked with Federal Fisheries Permit number or State of Alaska Department of Fish and Game vessel registration number. Regulations that marker buoys be marked with identification information are essential to facilitate fisheries enforcement and actions concerning damage, loss, and civil proceedings. The ability to link fishing gear to the vessel owner or operator is crucial to enforcement of regulations.

This collection also provides a voluntary opportunity for Gulf of Alaska (GOA) individual fishing quota (IFQ) sablefish fishermen to use a gear that physically protects caught sablefish from depredation by whales. That option, the use of pot longline gear, currently exists in sablefish IFQ fisheries in the Bering Sea and Aleutian Islands management areas. Potential benefits of pot longline gear for sablefish fishing include: Mitigation of whale interaction with fishing gear, reduced mortality of seabirds, reduced bycatch of non-target fish species, reduced overall halibut mortality when targeting sablefish, and better accounting of total sablefish fishing mortality.

Whales are able to strip hooked fish from hook-and-line gear, which reduces the amount of sablefish caught by fishermen. As such, whale depredation represents undocumented fishing mortality.

Many seabird species are attracted to fishing vessels in order to forage on bait, offal, discards, and other prey made available by fishing operations. These interactions can result in direct mortality for seabirds if they become entangled in fishing gear or strike the vessel or fishing gear while flying.

Each vessel must use mandatory logbooks (see OMB Control No. 0648–0213 and 0648–0515) when participating in a longline pot fishery. When the number of pots deployed by a vessel is self-reported through logbooks, the use of pot tags provides an additional enforcement tool to ensure
