Medicare Program; Advancing Care Coordination Through Episode Payment Models (EPMs); Cardiac Rehabilitation Incentive Payment Model; and Changes to the Comprehensive Care for Joint Replacement Model; Delay of Effective Date

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule; delay of effective date.

SUMMARY: In accordance with the memorandum of January 20, 2017, from the Assistant to the President and Chief of Staff, entitled "Regulatory Freeze

Pending Review", this action delays for 60 days from the date of the memorandum the effective date of the rule entitled "Advancing Care Coordination Through Episode Payment Models (EPMs); Cardiac Rehabilitation Incentive Payment Model; and Changes to the Comprehensive Care for Joint Replacement Model" published in the January 3, 2017 **Federal Register** (82 FR 180). That rule implements three new Medicare Parts A and B episode payment models and a Cardiac Rehabilitation (CR) Incentive Payment model, and implements changes to the existing Comprehensive Care for Joint Replacement model under section 1115A of the Social Security Act (the Act). Under the three new episode payment models, acute care hospitals in certain selected geographic areas will participate in retrospective episode payment models targeting care for Medicare fee-for-service beneficiaries receiving services during acute myocardial infarction, coronary artery bypass graft, and surgical hip/femur fracture treatment episodes. All related care within 90 days of hospital discharge will be included in the episode of care. Under the CR Incentive Payment model, acute care hospitals in certain selected geographic areas will receive retrospective incentive payments for beneficiary utilization of cardiac rehabilitation/intensive cardiac rehabilitation services during the 90 days following discharge from a hospitalization treatment of an acute myocardial infarction or coronary artery bypass graft surgery. We believe these models will further our goals of improving the efficiency and quality of care for Medicare beneficiaries receiving care for these common clinical conditions and procedures.
