Regulatory Review Information

This rule is not a significant regulatory action for the purposes of E.O. 12866 and has been reviewed by the Office of Management and Budget (OMB). It is also not a major rule as defined in 5 U.S.C. Chapter 8, Congressional Review of Agency Rulemaking. As required by the Regulatory Flexibility Act, we certify that this rule will not have a significant impact on a substantial number of small entities. It simply adds address and contact information for a new NARA facility.

NARA believes that a public comment period is unnecessary as this rule simply adds a new NARA facility, so it meets the good cause exception under the Administrative Procedure Act (5 U.S.C.(b)(3)(B)). This rule also does not have any Federalism implications.

[MB Docket No. 16–161; FCC 17–3]

Expansion of Revisions to Public Inspection File Requirements—Broadcaster Correspondence File and Cable Principal Headend Location

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) eliminates two public inspection file requirements: The requirement that commercial broadcast stations retain in their public inspection file copies of letters and emails from the public; and the requirement that cable operators maintain for public inspection the designation and location of the cable system's principal headend. Our actions will reduce regulatory burdens on commercial broadcasters and cable operators, advance regulatory parity with respect to our public file requirements among various program distributors, and improve security at local stations and principal headend locations.

DATES: Effective February 23, 2017, except for the amendments to §§ 73.3526, 76.5, 76.1700, and 76.1708, which contain information collection requirements that have not been approved by OMB. The Commission will publish a document in the **Federal Register** announcing the effective date of those amendments.

Paperwork Reduction Act of 1995 Analysis

The *Report and Order* contains new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA). The requirements will be submitted to the Office of Management and Budget (OMB) for review under section 3507(d)

of the PRA. OMB, the general public, and other Federal agencies will be invited to comment on the new or modified information collection requirements contained in this proceeding. In addition, we note that pursuant to the Small Business Paperwork Relief Act of 2002, we previously sought specific comment on how the Commission might further reduce the information collection burden for small business concerns with fewer than 25 employees.

Summary**I. Introduction**

1. In the *Report and Order*, we eliminate two public inspection file requirements: (i) The requirement that commercial broadcast stations retain in their public inspection file copies of letters and emails from the public; and (ii) the requirement that cable operators maintain for public inspection the designation and location of the cable system's principal headend. Because of potential privacy concerns associated with putting the correspondence file online and because many cable operators prefer not to post online the location of their principal headend for security reasons, removing these requirements will enable commercial broadcasters and cable operators to make their entire public inspection file available online without these privacy and security concerns and eliminate the need to maintain a local public file.

2. Principal headend location information must be accessible to the Commission, however, to enable it to enforce its signal leakage rules and to respond to must-carry and signal leakage complaints. In addition, broadcast television stations must have access to this information in order to exercise their must-carry rights and franchisors may need it in connection with their oversight of local cable systems and operations. Accordingly, we will require cable systems to provide principal headend location information to these entities upon request. In lieu of responding to individual requests for such information, operators may alternatively elect voluntarily to provide this information to the Commission for inclusion in the Commission's online public inspection file ("OPIF") database and may elect to make the information publicly available there.

3. Eliminating the correspondence file and principal headend public file requirements will reduce regulatory burdens on commercial broadcasters and cable operators. By permitting these entities to cease maintaining a local public file, our actions will also advance
