20.0 eInduction Option

20.1 Description

Electronic Induction (eInduction) is an electronic alternative to using the following paper PS Forms: 8125, 8125C, 8125CD, and 8017 for all containers entered at the dock of a processing facility or claiming a Destination Delivery Unit (DDU) discount. eInduction uses Intelligent Mail container barcode (IMcb) scans to determine container payment and delivery status, and verifies payment and entry location by matching IMcb scan data to electronic documentation (eDoc) information. Containers are eligible for eInduction at certain designated facilities. Additional information, including information regarding verification and associated assessments, is provided in Publication 6850, *Publication for Streamlined Mail Acceptance for Letters and Flats*, at <https://postalpro.usps.com/node/581>.

20.2 Approval

Mailers may seek authorization to participate in the eInduction program by contacting Business Mailer Support (BMS); see 608.8 for contact information.

20.3 General Eligibility Standards

First-Class Mail, Periodicals, USPS Marketing Mail letters and flats, and Bound Printed Matter presorted or carrier route barcoded flats and packages are eligible for eInduction. All containers entered under eInduction must:

a. Be labeled with a USPS placard and a unique Intelligent Mail container

barcode. All required pallets and similar containers (such as all-purpose containers, hampers, and gaylords) and all containers prepared under 8.0 must display container placards that include accurately encoded Intelligent Mail container barcodes (IMcb) as described in 708.6.6. Mailing documentation must indicate each container participating in eInduction.

b. Be part of a mailing using an approved electronic method to transmit a postage statement and mailing documentation to the *PostalOne!* system.

c. Not include containers included on paper 8125/8017 forms.

d. Be included on a scheduled FAST appointment when entered at a USPS processing facility.

20.4 Additional Standards

20.4.1 Special Support for Continuous Mailers

Mailers who cannot generate a finalized postage statement two hours before container entry may request approval for an eInduction Continuous Mailer ID, (MID). Once approved, mailers using an authorized Continuous MID in the IMcb may enter any container with the approved MID in the IMcb prior to the receipt of electronic documentation. Mailers are required to submit an eDoc and generate a finalized postage statement for all eInduction Continuous MID containers within one calendar day of the unload scan. Mailers may request authorization for a continuous MID through the Business Customer Gateway. The USPS must approve the mailer request before the mailer may participate in the continuous MID process.
