**Title:** Passenger and Crew Manifest (Advance Passenger Information System).

**OMB Number:** 1651-0088.

**Form Number:** None.

**Abstract:** The Advance Passenger Information System (APIS) is an automated method through which U.S. Customs and Border Protection (CBP) receives information about passengers and crew onboard inbound and outbound international flights before their arrival in or departure from the United States. APIS data includes biographical information for international air passengers arriving in or departing from the United States, allowing the data to be checked against CBP databases. The information is submitted for both commercial and private aircraft flights.

APIS is authorized under the Aviation and Transportation Security Act, Public Law 107-71. Under this statute, air carriers operating a passenger flight in foreign air transportation to the United States must electronically transmit to CBP a passenger and crew manifest containing specific identifying data elements and any other information that DHS determines is reasonably necessary to ensure aviation safety. The specific passenger and crew identifying information required by statute consists of the following: full name; date of birth; gender; citizenship; document type; passport number; country of issuance and expiration date; and alien registration number where applicable. The APIS regulatory requirements are specified in 19 CFR 122.49a, 122.49b, 122.49c, 122.75a, 122.75b, and 122.22. These provisions list all the required APIS data.

Respondents submit their electronic manifest either through a direct interface with CBP, or using eAPIS which is a web-based system that can be accessed at <https://eapis.cbp.dhs.gov/>.
