

National Environmental Policy Act (NEPA)

In 2012, NMFS prepared an EA analyzing the potential effects to the human environment from conducting rocky intertidal surveys along the California and Oregon coasts and issued a Finding of No Significant Impact (FONSI) on November 26, 2012 on the issuance of an IHA for PISCO's rocky intertidal surveys in accordance with section 6.01 of the NOAA Administrative Order 216-6 (Environmental Review Procedures for Implementing the National Environmental Policy Act, May 20, 1999). We have reviewed the application for a renewed IHA for ongoing monitoring activities for 2017-18 as well as results from the 2014-15 monitoring report. Based on that review, we have determined that the action is very similar to that considered in the previous IHA. We conducted an environmental review and found no significant new circumstances or information relevant to environmental concerns have been identified. Thus, we have determined that the preparation of a new or supplemental NEPA document is not necessary. The 2012 NEPA documents are available for review at www.nmfs.noaa.gov/pr/permits/incidental/research.htm.

Authorization

As a result of these determinations, we have issued an IHA to PISCO for conducting the described activities related to rocky intertidal monitoring surveys along the Oregon and Washington coasts from February 21, 2017 through February 20, 2018 provided the previously described mitigation, monitoring, and reporting requirements are incorporated.
