Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as the specific requirements at 40 CFR part 60, subpart QQ. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or

any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form numbers: None.

Respondents/affected entities:

Graphics arts facilities.

Respondent's obligation to respond:

Mandatory (40 CFR part 60 Subpart QQ).

Estimated number of respondents: 21 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 1,920 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$198,000 (per year), which includes \$0 annualized capital/startup and operation & maintenance costs.

Changes in the estimates: There is an adjustment increase in the total estimated burden and cost as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred for two reasons: (1) This ICR assumes all existing respondents will have to familiarize with the regulatory requirements each year; and (2) the burden has increased due to an increase in the estimated number of sources subject to the standard. The number of sources has increased by one since the last ICR to account for industry growth in the past three years.

Courtney Kerwin,

Director, Regulatory Support Division.

Abstract: The Clean Air Act (CAA) contains several provisions directing the EPA to require source owners to conduct monitoring to support certification as to their status of compliance with applicable

requirements. These provisions are set forth in section 504 and section 114 of the CAA. Under CAA section 504(c), each operating permit must "set forth inspection, entry, monitoring, compliance, certification and reporting requirements to assure compliance with the permit terms and conditions." See also CAA section 504(a) (each permit shall require reporting of monitoring and such other conditions as are necessary to assure compliance). CAA section 504(b) allows us to prescribe by rule, methods and procedures for determining compliance recognizing that continuous emissions monitoring systems need not be required if other procedures or methods provide sufficiently reliable and timely information for determining compliance. Section 114(a)(1) of the CAA provides additional authority concerning monitoring, reporting, and recordkeeping requirements. This section provides the Administrator with the authority to require any owner operator of a source to install and to operate monitoring systems and to record the resulting monitoring data. We promulgated the Compliance Assurance Monitoring rule, 40 CFR part 64, on October 22, 1997 (62 FR 54900), pursuant to these provisions. In accordance with CAA section 114(c) and CAA section 503(e), the monitoring information source owners must submit must also be available to the public except under circumstances set forth in section 114(c) of the CAA. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations are listed in 40 CFR part 9.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are all facilities required to have an operating permit under Title V of the CAA. See section 502(a) of the CAA, which defines the sources required to obtain a Title V permit. See also 40 CFR 70.2 and 71.2.

Respondent's obligation to respond: Mandatory under Title V of the CAA. See section 502(a) of the CAA, which defines the sources required to obtain a Title V permit. See also 40 CFR 70.2 and 71.2.

Estimated number of respondents: There are 24,121 pollutant specific emission units (PSEUs), where the number of respondents is the number of PSEUs subject to the compliance assurance monitoring rule, and 116 permitting authorities. Therefore, the
