FOR FURTHER INFORMATION CONTACT: Virgil Hobbs, Assistant Administrator, Finance & Marketing, Southeastern

Power Administration, Department of Energy, 1166 Athens Tech Road, Elberton, Georgia 30635, (706) 213–3838.

SUPPLEMENTARY INFORMATION: The Federal Energy Regulatory Commission (FERC) confirmed and approved on a final basis Wholesale Power Rate Schedules SOCO–1–E, SOCO–2–E, SOCO–3–E, SOCO–4–E, ALA–1–N, MISS–1–N, Duke–1–E, Duke–2–E, Duke–3–E, Duke–4–E, Santee–1–E, Santee–2–E, Santee–3–E, Santee–4–E, SCE&G–1–E, SCE&G–2–E, SCE&G–3–E, SCE&G–4–E, Pump–1–A, Pump–2, Regulation–1, and Replacement–1 applicable to Georgia-Alabama-South Carolina System of Projects' power for a period ending September 30, 2017. (143 FERC ¶ 62,002; Apr. 2, 2013).

Discussion: The Georgia-Alabama-South Carolina System (System) consists of ten projects in or on the border of the states of Georgia, Alabama, and South Carolina. The power generated at these projects is sold to 170 preference entities serving 203 preference customers in Alabama, Florida, Georgia, Mississippi, South Carolina, and North Carolina. The System provides 2,184,232 kilowatts of capacity and about 3,381,000 MWh of average annual energy from stream-flow based on modeling for the period of record.

Existing rate schedules are predicated upon a July 2012 repayment study and other supporting data. A repayment study prepared in February of 2017 shows that existing rates meet repayment criteria and would generate a large surplus.

The revised repayment study shows that a revenue reduction of \$18,991,000 in Fiscal Year 2018 and all future years over the current repayment study will result in all costs being repaid within the term of these rate schedules or their service life. The revenue requirement is \$200,000,000 per year. Southeastern is proposing to revise the existing rate schedules to generate this revenue. The rate adjustment reduces the Revenue Requirement by about nine percent (9%). To collect this reduced revenue requirement, rates for capacity have been reduced by fifteen percent (15%). The current energy rate will be extended.

This rate reduction is due to capitalized deficits that were unpaid in 2012 being recovered, and required payments due in the last five years being met.¹ Southeastern is proposing

¹ In 2012, Southeastern had large repayment obligations on two system projects as well as outstanding capitalized deferred expenses. These

the following rate schedules to be effective for the period from October 1, 2017, through September 30, 2022.

The proposed rates for capacity, energy, and generation services are as follows:

Capacity \$4.09 per kW per month
Energy 12.33 mills per kWh
Generation Services \$0.12 per kW per month

Under this scenario, 75 percent of generation revenues are recovered from capacity sales and 25 percent are recovered from energy sales. These rates are expected to produce an average revenue of \$200,119,000 in FY 2018, \$200,030,000 in FY 2019, and \$200,011,000 in FY 2020 and all future years. The change in revenue for FY 2018 to FY 2020 is due to changing transmission arrangements.

The rates for transmission, scheduling, reactive supply, and regulation and frequency response apply to all four scenarios and are illustrated in Table 1.
