SUPPLEMENTARY INFORMATION: Each year satellite systems must submit royalty payments to the Register of Copyrights as required by the statutory license set forth in section 119 of the Copyright Act for the retransmission to satellite subscribers of over-the-air television broadcast signals. See 17 U.S.C. 119(b). The Copyright Royalty Judges (Judges) oversee distribution of royalties to copyright owners whose works were included in a qualifying transmission and who timely filed a claim for royalties.

Allocation of the royalties collected occurs in one of two ways. In the first instance, the Judges may authorize distribution in accordance with a negotiated settlement among all claiming parties. 17 U.S.C. 119(b)(5)(A), 801(b)(3)(A). If all claimants do not reach an agreement with respect to the royalties, the Judges must conduct a proceeding to determine the distribution of any royalties that remain in controversy. 17 U.S.C. 119(b)(5)(B), 801(b)(3)(B). Alternatively, the Judges may, on motion of claimants and on notice to all interested parties, authorize a partial distribution of royalties, reserving on deposit sufficient funds to

resolve identified disputes. 17 U.S.C. 119(b)(5)(C), 801(b)(3)(C).

On February 17, 2017, representatives of all the Allocation Phase claimant categories (formerly "Phase I")¹ filed with the Judges a motion requesting a partial distribution amounting to 60% of the 2015 satellite royalty funds pursuant to section 801(b)(3)(C) of the Copyright Act. 17 U.S.C. 801(b)(3)(C). That section requires that, before ruling on the motion, the Judges publish a notice in the **Federal Register** seeking responses to the motion for partial distribution to ascertain whether any claimant entitled to receive the subject royalties has a reasonable objection to the requested distribution. Accordingly, this notice seeks comments from interested claimants on whether any reasonable objection exists that would preclude the distribution of 60% of the 2015 satellite royalty funds to the Allocation Phase Claimants. Parties objecting to the proposed partial distribution must advise the Judges of the existence and extent of all their objections by the end of the comment period. The Judges will not consider any objections with respect to the partial distribution motion that come to their attention after the close of the comment period.

The Motion of the Allocation Phase Claimants is posted on the Copyright Royalty Board Web site at <http://www.loc.gov/crb>.

Dated: April 11, 2017.

Suzanne M. Barnett,
Chief U.S. Copyright Royalty Judge.

NATIONAL SCIENCE FOUNDATION

Radio Receiver Systems: R&D Innovation Needs and Impacts on Technology Policy

AGENCY: The National Coordination Office (NCO) for Networking and Information Technology Research and Development (NITRD), National Science Foundation.

ACTION: Notice of workshop.

SUMMARY: This workshop will focus on spectrum sharing radio receiver systems and will provide a forum for information exchange and the identification of relevant research and development opportunities.

DATES: The workshop will take place on May 5, 2017 from 8:30 a.m. to 5 p.m. ET.

ADDRESSES: The workshop will take place at the National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230. Participation in the workshop is by invitation only. Seating for observers is limited and will be available on a first come first served basis. This event will also be webcast. The event agenda and information about the webcast will be available the week of the event at: https://www.nitrd.gov/nitrdgroups/index.php?title=WSRD_Workshop_IX.

FOR FURTHER INFORMATION CONTACT: Wendy Wigen at 703-292-4873 or wigen@nitrd.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a

day, 7 days a week, 365 days a year (including federal holidays).

SUPPLEMENTARY INFORMATION:

Overview: This notice is issued by the National Coordination Office for the Networking and Information Technology Research and Development (NITRD) Program. Agencies of the NITRD Program are holding a workshop of experts from government, private industry, and academia to provide a forum for information exchange on spectrum sharing radio receiver systems and identify relevant research and development opportunities. Further information about the NITRD may be found at: <https://www.nitrd.gov>.

Background: Principles of co-existence and interference tolerance are often overlooked and under-exploited in today's radio receiver systems. For example, a receiver's ability to accept wanted signals or reject unwanted signals impacts the quality of the information transmitted. The workshop will address various signal reception topics including technology advances for receivers, transmitters, filters, antenna design, signal processing techniques, and policy issues. While focus has been on the transmitter side of the radio system in the past, focusing on the receiver systems early in the next generation technology development process has been identified as an important step in assuring interference tolerance.

Workshop Goals:

- Outline the wireless spectrum sharing receiver needs, scenarios and issues for the short-term and long-term.
- Discuss the technology and regulatory frameworks that can deliver appropriate receiver solutions, including those needed for emerging IoT scenarios.
- Identify innovative tools, techniques, experimentation, and recommendations for additional research.

Workshop Objectives: The objectives of the workshop are to establish the current state-of-the-art, define characteristics that are needed in the radio receiver system to better facilitate spectrum sharing, identify the opportunities and challenges in current receiver technologies, and examine the implementation and adoption issues that exist.

Submitted by the National Science Foundation in support of the Networking and Information Technology Research and Development

(NITRD) National Coordination Office (NCO) on April 12, 2017.
