

Form EIA-857, Monthly Report of Natural Gas Purchases and Deliveries to Consumers

Form EIA-857 collects data on the quantity and cost of natural gas delivered to distribution systems and the quantity and revenue of natural gas delivered to end-use consumers by market sector, on a monthly basis by state. EIA is not proposing any substantive changes to Form EIA-857.

Form EIA-910, Monthly Natural Gas Marketer, and Form EIA-912 Weekly Underground Natural Gas Storage Report

Form EIA-910 collects information on natural gas sales from marketers in selected states that have active customer choice programs. EIA is requesting information on the volume and revenue for natural gas commodity sales and any receipts for distribution charges and taxes associated with the sale of natural gas.

Form EIA-912 collects information on weekly inventories of natural gas in underground storage facilities.

EIA proposes a permanent change in the confidentiality pledge to respondents to Forms EIA-910 and EIA-912. EIA revised its confidentiality pledge to Forms EIA-910 and EIA-912 survey respondents under the Confidential Information Protection and Statistical Efficiency Act (44 U.S.C. 3501 (note)) (CIPSEA) in an emergency **Federal Register** notice published on January 12, 2017 in 82 FR 3764. These revisions were necessary because of requirements from the Federal Cybersecurity Enhancement Act of 2015 (Pub. L. 114-11, Division N, Title II, Subtitle B, Sec. 223). This law permits and requires the Secretary of the Department of Homeland Security (DHS) to provide Federal civilian agencies' information technology systems with cybersecurity protection for their Internet traffic. Federal statistics provide key information that the Nation uses to measure its performance and make informed choices about budgets, energy, employment, health, investments, taxes, and a host of other significant topics. Strong and trusted confidentiality and exclusively statistical use pledges under the Confidential Information Protection and Statistical Efficiency Act (CIPSEA) and similar statistical confidentiality pledges are effective and necessary in honoring the trust that businesses, individuals, and institutions, by their responses, place in statistical agencies. EIA proposed to make this change permanent in a separate **Federal Register** notice released on March 1,

2017 in 82 FR 12217 for all EIA surveys protected under CIPSEA. In this notice EIA proposes to permanently revise the confidentiality pledge to Form EIA-910 and EIA-912 respondents as follows:

The information you provide on Form EIA-xxx will be used for statistical purposes only and is confidential by law. In accordance with the Confidential Information Protection and Statistical Efficiency Act of 2002 and other applicable Federal laws, your responses will not be disclosed in identifiable form without your consent. Per the Federal Cybersecurity Enhancement Act of 2015, Federal information systems are protected from malicious activities through cybersecurity screening of transmitted data. Every EIA employee, as well as every agent, is subject to a jail term, a fine, or both if he or she makes public ANY identifiable information you reported.

EIA is not proposing any other substantive changes to Form EIA-910.

EIA proposes one additional change to Form EIA-912. EIA proposes to include an additional geographic data element for working gas collection and publication in the Lower 48 states:

a. Divide the "South Central" reporting region into "South Central Salt" and "South Central Nonsalt." Currently EIA categorizes storage operators as either Salt facilities or Nonsalt facilities and allocates their volumes entirely to that region. This proposed change would require respondents to allocate volumes in their reported data between Salt facilities and Nonsalt facilities; this would improve the accuracy of EIA's published estimates on underground storage. For example, under the current methodology, volumes reported by a respondent with majority salt storage would be allocated entirely to the "South Central Salt" region, even if nearly half of their volumes were stored in nonsalt facilities. Currently, operators with more than 15 billion cubic feet (Bcf) of storage capacity in the South Central region report volumes separately between Salt facilities or Nonsalt facilities. This proposed change will require all operators in the reporting sample to report the same way.

Request for Comments: EIA invites comments on the extension of this information collection package and the proposed changes discussed above to the corresponding survey forms and instructions.
