

Mounting, 214 Side Impact Protection, 216 Roof Crush Resistance, 219 Windshield Zone Intrusion, and 302 Flammability of Interior Materials.

The petitioner also contends that the subject non-U.S. certified vehicles are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 Controls and Displays: The speedometer must be reprogrammed to read in miles per hour (mph) and all other applicable control, telltale and indicator symbols will be inspected, and if necessary, modified to meet the requirements of the standard.

Standard No. 108 Lamps, Reflective Devices and Associated Equipment: Replacement of the front and rear side marker lamp, and headlamp assemblies with U.S.-conforming components.

Standard No. 110 Tire Selection and Rims: Installation of the required tire information placard.

Standard No. 111 Rearview Mirrors: Inscription of the required warning statement on the face of the passenger side rearview mirror.

Standard No. 138 Tire Pressure Monitoring Systems: Installation of U.S. model tire pressure monitoring system hardware and software components.

Standard No. 208 Occupant Crash Protection: Installation of U.S. model software to cause the advanced air bag functions to be identical to the U.S.-certified 2010 Lamborghini Murcielago PC.

Standard No. 225 Child Restraint Anchorage Systems: Installation of U.S. model child restraint anchorage components.

Standard No. 301 Fuel System Integrity: Fuel system components will be inspected and any non-U.S. model components will be replaced with U.S. model components.

Standard No. 401 Interior Trunk Release: Installation of U.S. model interior trunk release components.

The petitioner additionally states that a vehicle identification plate must be affixed to the vehicle near the left windshield pillar to meet the requirements of 49 CFR part 565.

Because the subject petition covers nonconforming vehicles that have been manufactured on or after September 1, 2006, compliance with the advanced air bag requirements of FMVSS No. 208 is of significant concern to the agency. NHTSA is therefore particularly interested in comments regarding the ability of a Registered Importer to readily alter the subject vehicles to fully meet the driver and front outboard passenger frontal crash protection and child passenger protection requirements of FMVSS No. 208. The following is a

partial listing of the components that may be affected:

- a. Driver's frontal air bag module
- b. Passenger frontal air bag module
- c. Passenger frontal air bag cover
- d. Knee air bags
- e. Knee bolsters
- f. Passenger outboard frontal seat belt system
- g. Driver and front outboard seat assemblies including seat tracks and internal seat components
- h. Steering wheel components, including the clock spring assembly, the steering column, and all connecting components

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above addresses both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.
