

Kimberly Hardy, APHIS' Information Collection Coordinator, at 301-851-2483.

SUPPLEMENTARY INFORMATION:

Title: National Animal Health Monitoring System; Beef 2017 Study.
OMB Control Number: 0579-0326.

Type of Request: Reinstatement of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is authorized, among other things, to protect the health of U.S. livestock and poultry populations by preventing the introduction and interstate spread of serious diseases and pests of livestock and by eradicating such diseases from the United States when feasible. In connection with this mission, APHIS operates the National Animal Health Monitoring System (NAHMS), which collects data on the prevalence and economic importance of livestock diseases and associated risk factors.

NAHMS' national studies are a collaborative industry and government initiative to help determine the most effective means of preventing and controlling diseases of livestock. APHIS is the only agency responsible for collecting data on livestock health.

APHIS plans to conduct the Beef 2017 Study as part of an ongoing series of NAHMS studies on the U.S. livestock population. The purpose of this study is to collect information to describe trends in beef cow-calf health and management practices; describe management practices and producer beliefs related to animal welfare, emergency preparedness, environmental stewardship, recordkeeping, and animal identification; and describe antimicrobial use practices (stewardship) and determine the prevalence and antimicrobial resistance patterns of potential food-safety pathogens.

This study will require completion of producer agreements, consent forms, and on-farm questionnaires. In addition, biologic and forage sampling will be available to selected participants who complete the Veterinary Services Initial Visit questionnaire.

The information collected through this study will be analyzed and organized into descriptive reports. One of the reports will present change over time from previous NAHMS beef studies. In addition, several information sheets will be derived from this report and disseminated by APHIS to producers, academia, veterinarians, and other stakeholders and interested

parties. Participation in this study is voluntary and up to the producer to decide whether or not he or she wishes to participate.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of Burden: The public reporting burden for this collection of information is estimated to average 0.4 hours per response.

Respondents: Beef producers.

Estimated Annual Number of Respondents: 4,000.

Estimated Annual Number of Responses per Respondent: 4.

Estimated Annual Number of Responses: 14,842.

Estimated Total Annual Burden on Respondents: 5,894 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 3rd day of May 2017.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.
