[EPA-R04-OAR-2014-0430; FRL-9961-89-Region 4]

Air Quality Plans; Tennessee; Infrastructure Requirements for the 2012 PM_{2.5} National Ambient Air Quality Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve the State Implementation Plan (SIP) submission, submitted by the State of Tennessee, through the Tennessee Department of Environment and Conservation (TDEC), on December 16, 2015, to demonstrate that the State meets the infrastructure requirements of the Clean Air Act (CAA or Act) for the 2012 annual fine particulate matter (PM_{2.5}) national ambient air quality standard (NAAQS). The CAA requires that each state adopt and submit a SIP for the implementation, maintenance and enforcement of each NAAQS promulgated by EPA, which is commonly referred to as an “infrastructure SIP submission.” TDEC certified that the Tennessee SIP contains provisions that ensure the 2012 Annual PM_{2.5} NAAQS is implemented,

enforced, and maintained in Tennessee. EPA is finalizing its determination that Tennessee’s infrastructure SIP submission, provided to EPA on December 16, 2015, satisfies certain required infrastructure elements for the 2012 Annual PM_{2.5} NAAQS.

DATES: This rule will be effective June 9, 2017.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA-R04-OAR-2014-0430. All documents in the docket are listed on the www.regulations.gov Web site. Although listed in the index, some information is not publicly available, *i.e.*, Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303-8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office’s official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Tiereny Bell, Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303-8960. Ms. Bell can be reached via electronic mail at bell.tiereny@epa.gov or via telephone at (404) 562-9088.

SUPPLEMENTARY INFORMATION:

I. Background and Overview

On December 14, 2012, EPA promulgated a revised primary annual PM_{2.5} NAAQS. The standard was strengthened from 15.0 micrograms per cubic meter (µg/m³) to 12.0 µg/m³. See 78 FR 3086 (January 15, 2013). Pursuant to section 110(a)(1) of the CAA, states are required to submit SIPs meeting the applicable requirements of section 110(a)(2) within three years after promulgation of a new or revised NAAQS or within such shorter period as EPA may prescribe. Section 110(a)(2) requires states to address basic SIP elements such as requirements for monitoring, basic program requirements and legal authority that are designed to assure attainment and maintenance of the NAAQS. States were required to submit such SIPs for the 2012 Annual PM_{2.5} NAAQS to EPA no later than December 14, 2015.

In a proposed rulemaking published on January 9, 2017 (82 FR 2295), EPA proposed to approve portions of Tennessee’s December 16, 2015, SIP submission for the 2012 Annual PM_{2.5} NAAQS. The details of Tennessee’s

submission and the rationale for EPA's actions for this final rule are explained in the January 9, 2017 proposed rulemaking. Comments on the proposed rulemaking were due on or before February 8, 2017. EPA received no comments.

II. Final Action

EPA is taking final action to approve Tennessee's infrastructure submissions submitted on December 16, 2015, for the 2012 Annual PM_{2.5} NAAQS for the infrastructure SIP requirements, with the exception of the interstate transport requirements of section 110(a)(2)(D)(i)(I) and (I) (prongs 1, 2 and 4). EPA notes that the Agency is not approving any specific rule, but rather approving that Tennessee's already approved SIP meets certain CAA requirements. With respect to the interstate transport requirements of section 110(a)(2)(D)(i)(I) and (I) (prongs 1, 2 and 4), EPA will consider these requirements in relation to Tennessee's 2012 Annual PM_{2.5} NAAQS infrastructure submission in a separate rulemaking. EPA is taking final action to approve all other elements of Tennessee's infrastructure SIP submissions for the 2012 Annual PM_{2.5} NAAQS because the submission is consistent with section 110 of the CAA.

III. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. See 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- does not impose an information collection burden under the provisions

of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other

required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 10, 2017. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. See section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: April 17, 2017.

V. Anne Heard,

Acting Regional Administrator, Region 4.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart RR—Tennessee

- 2. Section 52.2220(e), is amended by adding entry "110(a)(1) and (2) Infrastructure Requirements for the 2012 Annual PM_{2.5} NAAQS" at the end of the table to read as follows:

§ 52.2220 Identification of plan.

* * * * *

40 CFR Part 52

[EPA-R05-OAR-2016-0707; FRL-9962-09-Region 5]

Air Plan Approval; Indiana; Commissioner's Order for Carmeuse Lime, Inc.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving, as a revision to the Indiana State Implementation Plan (SIP), a submittal from the Indiana Department of Environmental Management (IDEM) to EPA, dated December 22, 2016. The submittal consists of an order issued by the Commissioner of IDEM that establishes permanent and enforceable sulfur dioxide (SO₂) emission limits for Carmeuse Lime, Inc. (Carmeuse), applicable to its Gary, Indiana lime manufacturing plant. IDEM submitted this order so the area near Carmeuse can be designated "attainment" of the 2010 primary SO₂ National Ambient Air Quality Standards (NAAQS), a matter that will be addressed in a separate future rulemaking. EPA's approval of this order would make these SO₂ emission limits and applicable reporting, recordkeeping, and compliance demonstration requirements part of the federally enforceable Indiana SIP.

DATES: This direct final rule will be effective July 10, 2017, unless EPA receives adverse comments by June 9, 2017. If adverse comments are received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID Nos. EPA-R05-OAR-2016-0707 at <http://www.regulations.gov> or via email to

aburano.douglas@epa.gov. For comments submitted at Regulations.gov, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from Regulations.gov. For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Joseph Ko, Environmental Engineer, Attainment Planning and Maintenance Section, Air Programs Branch (AR-18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-7947, ko.joseph@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This supplementary information section is arranged as follows:

- I. Why did IDEM issue this commissioner's order?
- II. What are the SO₂ limits in this commissioner's order?
- III. By what criterion is EPA reviewing this SIP revision?
- IV. What action is EPA taking?
- V. Incorporation by Reference
- VI. Statutory and Executive Order Reviews

I. Why did IDEM issue this commissioner's orders?

On December 22, 2016, IDEM submitted for approval, as a revision to the Indiana SIP, an order issued by IDEM's Commissioner that establishes SO₂ emission limits for Carmeuse. SO₂ emission limits for Carmeuse previously did not exist in the Indiana SIP. IDEM established these emission limits so the area near Carmeuse can qualify in the future for being designated "attainment" of the 2010 primary SO₂ NAAQS. The history of the 2010 SO₂ NAAQS and the applicable Data Requirements Rule (DRR) is explained below in order to provide a more detailed explanation of the context for IDEM's request.

On June 3, 2010, pursuant to section 109 of the Clean Air Act (CAA), EPA revised the primary (health-based) SO₂ NAAQS by establishing a new one-hour standard codified at title 40 Code of Federal Regulations (CFR) section 51.17 (75 FR 35520). Pursuant to section 107(d) of the CAA, EPA must designate areas as either "unclassifiable," "attainment," or "nonattainment" for the 2010 one-hour SO₂ primary NAAQS. Under Section 107(d) of the CAA, a nonattainment area is any area that does not meet the NAAQS or that contributes to a violation in a nearby area. An attainment area is any area, other than a nonattainment area, that meets the NAAQS. Unclassifiable areas are those that cannot be classified on the basis of available information as meeting or not meeting the NAAQS.

On August 5, 2013, EPA published a final rule designating 29 areas in the United States as nonattainment for the 2010 SO₂ NAAQS, based on recorded air quality monitoring data from 2009-2011 that showed violations of the NAAQS (78 FR 47191). In that rulemaking, EPA committed to address, in separate future actions, the designations for all other areas for which EPA was not yet prepared to issue designations.

Following the initial August 5, 2013, designations, three lawsuits were filed against EPA in different U.S. District Courts, alleging that EPA had failed to perform a nondiscretionary duty under
