k. *Description of Request:* The licensee is proposing to install at the powerhouse an additional 140-kilowatt (kW) generating unit coupled to the existing 80-kW unit, for a combined project installed capacity of 220 kW. The new unit will result in an increase of the project's hydraulic capacity from 6 to 15 cubic feet per second. The installation of the new unit will not require any physical changes to the project features since the powerhouse was designed to accommodate an additional generating unit. All work will occur within the existing powerhouse. The licensee is requesting the amendment to increase hatchery production at the project.
