

Respondents: Business or other for-profit, not-for-profit institutions and state, local or tribal government.

Number of Respondents and Responses: 1,000 respondents; 2,000 responses.

Estimated Time per Response: 3 hours.

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in the Middle Class Tax Relief and Job Creation Act of 2012, Public Law 112–96 (Spectrum Act) § 6403(b)(4)(A).

Total Annual Burden: 6,000 hours.

Total Annual Cost: No Cost.

Privacy Act Impact Assessment: This information collection does not affect individuals or households; thus, there are no impacts under the Privacy Act.

Nature and Extent of Confidentiality: The information collection includes information identifying bank accounts and providing account and routing numbers to access those accounts. FCC considers that information to be records not routinely available for public inspection under 47 CFR 0.457, and exempt from disclosure under FOIA exemption 4 (5 U.S.C. 552(b)(4)).

Needs and Uses: This collection was approved under the emergency processing provision of the Paperwork Reduction Act (PRA), 5 CFR 1320.13. The Commission is now requesting OMB approval for this information collection for a full three year term. The Spectrum Act requires the Commission to reimburse broadcast television licensees for costs “reasonably incurred” in relocating to new channels assigned in the repacking process and Multichannel Video Programming Distributors (MVPDs) for costs reasonably incurred in order to continue to carry the signals of stations relocating to new channels as a result of the repacking process or a winning reverse auction bid.¹

The Commission decided through notice-and-comment rulemaking that it will issue all eligible broadcasters and MVPDs an initial allocation of funds based on estimated costs, which will be available for draw down (from individual accounts in the U.S. Treasury) as the entities incur expenses, followed by a subsequent allocation to the extent necessary. The reason for allowing eligible entities to draw down funds as they incur expenses is to reduce the chance that entities will be

unable to finance necessary relocation changes.²

The information collection for which we are requesting approval is necessary for eligible entities to instruct the Commission on how to pay the amounts the entities draw down, and for the entities to make certifications that reduce the risk of waste, fraud, abuse and improper payments.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: The Commission will continue to allow respondents to certify on the submission interface that some subscribership data contained in that submission are privileged or confidential commercial or financial information and that disclosure of such information would likely cause substantial harm to the competitive position of the entity making the submission. If the Commission receives a request for, or proposes to disclose such information, the respondent would be required to show, pursuant to Commission rules for withholding from public inspection information submitted to the Commission, that the information in question is entitled to confidential treatment. We will retain our current policies and procedures regarding the protection of submitted FCC Form 477 data subject to confidential treatment, including the use of only non-company specific aggregates of subscribership data in our published reports. Most of the broadband deployment data collected on Form 477 is publicly available on the FCC's Web site at <https://www.fcc.gov/general/broadband-deployment-data-fcc-form-477>. However, mobile providers can request confidential treatment of their

deployment data by spectrum band and some of the speed data associated with their mobile broadband deployment coverage areas.

Need and Uses: FCC Form 477 provides an understanding of the extent of broadband deployment, that facilitates the Commission's development of appropriate broadband policies, and enables the Commission to carry out its obligation under section 706 of the Telecommunications Act of 1996, as amended, to "determine whether advanced telecommunications capability is being deployed to all Americans in a reasonable and timely fashion." In addition, the information collected in Form 477 enhances the Commission's analysis and understanding of the extent of voice telephone services competition, which in turn supports the Commission's efforts to open all telecommunications markets to competition and to promote innovation and investment by all participants, including new entrants, as required by the Telecommunications Act of 1996.

The Commission staff uses the information to advise the Commission about the efficacy of its rules and policies adopted to implement the Telecommunications Act of 1996. The data are necessary to evaluate the status of local telecommunications competition and broadband deployment. The Commission uses the data to prepare reports that help inform consumers and policy makers at the federal and state level on the deployment and adoption of broadband services, as well as on developments related to competition in the voice telephone services market. The Commission also uses the data to support its analyses in a variety of rulemaking proceedings under the Communications Act, including those related to fulfilling its universal service mandate.

The Commission releases to the public the broadband deployment and mobile voice deployment data that it began collecting in 2014 as a result of the Order. This information is used by consumers, federal and state government agencies, analysts, and others to determine broadband service availability by provider, technology, and speed.
