Agricultural Marketing Service

[Doc. No. AMS–SC–17–0023]

Notice of Request for Extension and Revision of a Currently Approved Information Collection

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Agricultural Marketing Service's (AMS) intention to request approval, from the Office of Management and Budget, for an extension of and revision to the currently approved information collection for the Child Nutrition Labeling Program.

DATES: Comments on this notice must be received by July 21, 2017 to be assured of consideration.

SUPPLEMENTARY INFORMATION:

Title: Child Nutrition Labeling Program.

OMB Number: 0581–0261.

Expiration Date of Approval: 3 years from approval.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: The Child Nutrition (CN) Labeling Program is a voluntary technical assistance service to aid schools and institutions participating in

the National School Lunch Program (NSLP), School Breakfast Program (SBP), Child and Adult Care Food Program (CACFP), and Summer Food Service Program (SFSP) in determining the contribution toward the food-based meal pattern requirements of these programs. (See Appendix C to 7 CFR parts 210, 220, 225, and 226 for more information on this program). The existence of a CN label on a product assures schools and other Child Nutrition Program operators that the product contributes to the meal pattern requirements as printed on the label. However, there is no Federal requirement that commercial products must have a CN label statement in order to be included in meals served by schools and institutions. AMS officially opened the CN Labeling Program Operations Office on January 19, 2010.

To participate in the CN Labeling Program, a manufacturer submits a label application to AMS for evaluation. AMS reviews the product formulation to determine the contribution a serving of the product makes towards the food-based meal pattern requirements. The application form submitted to AMS is the same application form that a manufacturer submits to the USDA's Food Safety and Inspection Service (FSIS) Labeling and Program Delivery Division for review of meat and poultry labels. Participation in the CN Labeling Program is voluntary and manufacturers who wish to place a CN label on their products must comply with CN Labeling Program requirements.

Forest Service

Title: Non-Timber Forest Products Generic for Surveys, Interviews, and Focus Groups.

OMB Control Number: 0596-New.

Summary of Collection: Many laws and policies specifically direct the USDA Forest Service (FS) to consider and manage for non-timber forest products for the benefit of the American public and to meet trust responsibilities to American Indians and Alaskan Natives on federal and tribal lands. Primary authorities to collect information include the Multiple-Use Sustained-Yield Act of 1960 that requires the FS to manage national forests "under principles of multiple use and to produce a sustained yield of products and services." The Forest and Rangeland Renewable Resources Planning Act of 1974 requires the Secretary of Agriculture to "maintain a comprehensive inventory of renewable resources and evaluate opportunities to improve their yield of goods and services. The 2012 Planning Rule specifically requires "consideration of habitat conditions for wildlife, fish, and plants commonly enjoyed and used by the public for hunting, fishing, trapping, gathering, observing, and subsistence" on national forests.

Need and Use of the Information: Surveys, interviews, and focus groups administered under this generic collection will be designed to collect information from individuals and groups who forage for non-timber forest products and from natural resource professionals who manage land where non-timber forest products foraging takes place. Non-timber forest products

harvested for use as food, medicine, and other purposes are plants, mushrooms, and plant- or tree-derived goods like nuts, boughs, sap, and leaves. The FS and other land management agencies will not have a scientific basis for managing non-timber forest product resources and the lands that support them without this information. Also, FS will not have the necessary information to provide technical advice on this issue to other land management agencies and individuals.

Description of Respondents:

Individuals or households; Non-profit organizations and State, Local and Tribal government.

Number of Respondents: 14,250.

Frequency of Responses: Reporting: One time.

Total Burden Hours: 5,613.

Departmental Information Collection Clearance Officer.
