

senior leadership tasked with creating diversity and inclusion policy. Westat will conduct approximately 20 interviews per case study, with each interview lasting between 20–30 minutes.

- *Qualitative Interviews with HR Managers (n=90)*. Westat will purposefully select a subsample of employers with significant experience with disability employment and interview mid-level managers from those companies to collect more in-depth information. These interviews will cover questions about the employer’s current practices and attitudes towards employment of people with disabilities; barriers and facilitators towards disability employment; accommodations and technology available for employees with disabilities; and information flow about disability employment. These

interviews will last approximately 30 minutes.

II. Review Focus

Currently, the Department of Labor is soliciting comments concerning the above data collection for a study of employer policies and practices on the employment of people with disabilities. DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the Request for Information on Earnings, Dual Benefits, Dependents, and Third-Party Settlements (Form CA-1032, Form EN-1032) information collection. The OWCP uses this collection to obtain information from a Federal Employees' Compensation Act (FECA) claimant receiving workers' compensation benefits over an extended period. The OWCP uses the response to determine whether the claimant is entitled to continue receiving benefits and whether the benefit amount should be adjusted. The collection is necessary to ensure the beneficiary receives correct compensation. This information collection has been classified as a revision, because OWCP has made several clarifications to the data collection. The FECA authorizes this information collection. See 5 U.S.C. 8124 and 8149.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1240-0016. The current approval is scheduled to expire on May 31, 2017; however, the DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on February 27, 2017 (82 FR 11946).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section by June 30, 2017. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1240-0016. The OMB is

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
