

a key component of some of the economic statistics it is responsible for tracking. In addition, statutes in several states and U.S. territories refer to, or rely upon, the MIRS or the ARM Index for various purposes.⁴

The OMB control number for this information collection is 2590-0004. The current clearance for the information collection expires on July 31, 2017.

B. Burden Estimate

The Agency received a total of 1,369 monthly MIRS data submissions from 45 unique survey respondents over the period 2014–2016, representing an average of 456.3 monthly submissions per year from all respondents. Based on that figure and the expectation that it may receive slightly fewer data submissions going forward as compared to the last three years, FHFA estimates that it will receive an average of 450 data submissions annually over the next three years.

Most MIRS respondents submit their monthly MIRS data electronically through FHFA's MIRS web interface. Several, primarily larger, respondents transmit an electronic data file to FHFA, which then uploads the data to the same web interface. A few respondents still elect to complete FHFA Form #075 and submit it by facsimile. FHFA believes that, on average, a respondent will spend 20 minutes transmitting each monthly MIRS data set.

Thus, FHFA estimates that the annualized hour burden on all respondents imposed by this information collection over the next three years will be 150 hours (450 submissions × 0.33 hours).

C. Comments Request

FHFA requests written comments on the following: (1) Whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has practical utility; (2) the accuracy of FHFA's estimates of the burdens of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.
