SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes Class E airspace at N Bar Ranch Airport, Grass Range, MT, to support the development of IFR operations in standard instrument approach procedures at the airport.

History

On February 27, 2017, the FAA published in the **Federal Register** (82 FR 11866) Docket FAA-2017-0047 a notice of proposed rulemaking to establish Class E airspace extending upward from 700 feet above the surface at N Bar Ranch, Grass Range, MT. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11A, dated August 3, 2016, and effective September 15, 2016, which is incorporated by reference in 14 CFR

part 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016. FAA Order 7400.11A is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11A lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 establishes Class E airspace extending upward from 700 feet above the surface at N Bar Ranch, Grass Range, MT, within an area 3.6 miles wide extending 6.1 miles northeast and 5.9 miles southwest of the airport. This airspace is necessary to support IFR operations in new standard instrument approach and departure procedures at the airport.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures,” paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary regulated

navigation area (RNA) for the navigable waters of the Manhattan side of the East River, south of Dupont Street in Greenpoint, Brooklyn, and East 25th Street in Manhattan, and north of a line drawn from the northwest corner of Pier 5 Brooklyn to the northeast corner of the Governors Island Ferry Manhattan Terminal. The RNA is needed to protect personnel, vessels, and the marine environment from potential hazards associated with a dielectric oil spill response. This RNA establishes vessel speed restrictions on vessels transiting near the pollution response area unless specifically authorized by the First District Commander or the Captain of the Port New York to exceed those restrictions.
