

as legal requirements, and are beyond the direct scope of the Technical Guidance (*i.e.*, the Technical Guidance may inform these decisions, but the Technical Guidance does not mandate any specific mitigation be required).

NMFS acknowledges the importance of supporting sustainable ocean use, such as energy exploration and production on the Outer Continental Shelf, provided activities are conducted in a safe and environmentally responsible manner. Our development and implementation of the Technical Guidance are consistent with allowing activities vital to our nation's security and economy to proceed, including those mentioned in EO 13795. As an example, during the development of the Technical Guidance, NMFS recognized that action proponents may have varying abilities to model and estimate exposure, and that the Technical Guidance may be more complex than some action proponents are able to incorporate. Accordingly, NMFS developed optional user tools in the form of an alternative methodology and associated user spreadsheet to assist action proponents with the application the more complex acoustic thresholds. Additionally, NMFS recognized that for some proposed actions, analyses may have already substantially progressed using the prior thresholds or other methods for assessing hearing effects, and it would be impractical to begin those analyses anew, taking into account timing constraints, expense, and other considerations. Hence, NMFS has been using a transitional approach for "pipeline" cases that considers various factors to determine the extent to which the Technical Guidance would be considered.

The Office of Management and Budget previously classified the Technical Guidance as a Highly Influential Scientific Assessment (HISA). As such, the document underwent three independent peer reviews, at three different stages its development, including a follow-up to one of the peer reviews, prior to its dissemination by NMFS. Details of each peer review are included within the Technical Guidance (Appendix C), and specific peer reviewer comments and NMFS' responses are at <http://www.nmfs.noaa.gov/pr/acoustics/>. In addition to three independent peer reviews, there were three public comment periods. A previously published **Federal Register** Notice (81 FR 51694; August 4, 2016) provides substantive public comments and NMFS' responses.

NMFS is soliciting public comment and will also consult the appropriate Federal agencies to assist the Secretary

of Commerce in reviewing the Technical Guidance for consistency with the policy in section 2 of EO 13795. The Technical Guidance will remain in use during this review, and this review will not delay the processing of any permits, applications, or consultations currently underway.

NMFS advises the public to focus comments on those relating to the purpose of the review of the Technical Guidance under section 10 of EO 13795, which is to ensure consistency with the policy in section 2 of the EO, cited above. For example, NMFS welcomes comments on two particular aspects of the Technical Guidance:

(1) *Peer-reviewed scientific literature:* Information regarding the availability of published new science relevant to marine mammal hearing or impacts of noise on hearing since the publication of the Technical Guidance and suggestions for how to consider new information within the Technical Guidance, and

(2) *Implementation support:* Recommendations regarding how NMFS can further aid in the application and implementation of the Technical Guidance (based on difficulties encountered and/or ways NMFS can facilitate and/or improve implementation for action proponents).
