SUPPLEMENTARY INFORMATION:

I. Notice of the Application for Expansion

The Occupational Safety and Health Administration is providing notice that MET Laboratories, Inc. (MET), is applying for expansion of its current recognition as an NRTL. MET requests the addition of three test standards to its NRTL scope of recognition.

OSHA recognition of an NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition. Each NRTL's scope of recognition includes (1) the type of products the NRTL may test, with each type specified by its applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The Agency processes applications by an NRTL for initial recognition and for an expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the Agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides its preliminary finding. In the second notice, the Agency provides its final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA

maintains an informational Web page for each NRTL, including MET, which details the NRTL’s scope of recognition. These pages are available from the OSHA Web site at <http://www.osha.gov/dts/otpca/nrtl/index.html>.

MET currently has one facility (site) recognized by OSHA for product testing and certification, with its headquarters located at: MET Laboratories, Inc., 914 West Patapsco Avenue, Baltimore, Maryland 21230. A complete list of

MET’s scope of recognition is available at <https://www.osha.gov/dts/otpca/nrtl/met.html>.

II. General Background on the Application

MET submitted three applications, one dated October 15, 2015 (OSHA–2006–0028–0031), the second dated March 2, 2016 (OSHA–2006–0028–0032) and the third dated March 18, 2016 (OSHA–2006–0028–0033), to

expand its recognition to include three additional test standards. OSHA staff performed a detailed analysis of the application packets and reviewed other pertinent information. OSHA did not perform any on-site reviews in relation to these applications.

Table 1 below lists the appropriate test standards found in MET’s applications for expansion for testing and certification of products under the NRTL Program.

TABLE 1—PROPOSED LIST OF APPROPRIATE TEST STANDARDS FOR INCLUSION IN MET’S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
UL 2108	Standard for Low Voltage Lighting Systems.
UL 61010–2–091 *	Standard for Safety Requirements for Electrical Equipment for Measurement, Control and Laboratory Use—Part 2–091: Particular Requirements for Cabinet X-Ray Systems.
UL 61010–2–081 *	Standard for Safety Requirements for Electrical Equipment for Measurement, Control and Laboratory Use—Part 2–081: Particular Requirements for Automatic and Semi-Automatic Laboratory Equipment for Analysis and Other Purposes.

* Represents the standards that OSHA proposes to add to the NRTL Program’s List of Appropriate Test Standards.

III. Proposal To Add New Test Standard to the NRTL Program’s List of Appropriate Test Standards

Periodically, OSHA will propose to add new test standards to the NRTL list of appropriate test standards following an evaluation of the test standard document. To qualify as an appropriate test standard, the Agency evaluates the

document to (1) verify it represents a product category for which OSHA requires certification by an NRTL, (2) verify the document represents an end product and not a component, and (3) verify the document defines safety test specifications (not installation or operational performance specifications).

In this notice, OSHA proposes to add two new test standards to the NRTL

Program’s List of Appropriate Test Standards. Table 2, below, lists the test standards that are new to the NRTL Program. OSHA preliminarily determined these test standards are appropriate test standards and proposes to include them in the NRTL Program’s List of Appropriate Test Standards. OSHA seeks public comment on this preliminary determination.

TABLE 2—TEST STANDARDS OSHA IS PROPOSING TO ADD TO THE NRTL PROGRAM’S LIST OF APPROPRIATE TEST STANDARDS

Test standard	Test standard title
UL 61010–2–091	Standard for Safety Requirements for Electrical Equipment for Measurement, Control and Laboratory Use—Part 2–091: Particular Requirements for Cabinet X-Ray Systems.
UL 61010–2–081	Standard for Safety Requirements for Electrical Equipment for Measurement, Control and Laboratory Use—Part 2–081: Particular Requirements for Automatic and Semi-Automatic Laboratory Equipment for Analysis and Other Purposes.

IV. Preliminary Findings on the Application

MET submitted acceptable applications for expansion of its scope of recognition. OSHA’s review of the application file, and pertinent documentation, indicate that MET can meet the requirements prescribed by 29 CFR 1910.7 for expanding its recognition to include the addition of these three test standards for NRTL testing and certification listed above. This preliminary finding does not constitute an interim or temporary approval of MET’s application.

OSHA welcomes public comment as to whether MET meets the requirements of 29 CFR 1910.7 for expansion of its recognition as an NRTL. Comments should consist of pertinent written

documents and exhibits. Commenters needing more time to comment must submit a request in writing, stating the reasons for the request. Commenters must submit the written request for an extension by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer period. OSHA may deny a request for an extension if the request is not adequately justified. To obtain or review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Room N–3508, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. These materials also are available online at

<http://www.regulations.gov> under Docket No. OSHA–2006–0028.

OSHA staff will review all comments to the docket submitted in a timely manner and, after addressing the issues raised by these comments, will recommend to the Assistant Secretary for Occupational Safety and Health whether to grant MET’s applications for expansion of its scope of recognition. The Assistant Secretary will make the final decision on granting the applications. In making this decision, the Assistant Secretary may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of its final decision in the **Federal Register**.
