[Project No. 14816-000]

Merchant Hydro Developers, LLC, Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On January 11, 2017, Merchant Hydro Developers, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Nockamixon Pumped Storage Hydroelectric Project to be located near the unincorporated town of Kintnersville in Bucks County, Pennsylvania. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) A new upper reservoir with a surface area of 150 acres and a storage capacity of 2,250 acre-feet at a surface elevation of approximately 700 feet above mean sea level (msl) created through construction of a new roller-compacted concrete or rock-filled dam; (2) a lower reservoir using the existing Delaware Canal with a surface elevation of 170 feet msl; (3) a new 3,575-foot-long, 48-inch-diameter penstock connecting the upper and lower reservoirs; (4) a new 150-foot-long, 50-foot-wide powerhouse containing two turbine-generator units with a total rated capacity of 125 megawatts; (5) a new transmission line connecting the powerhouse to a nearby electric grid interconnection point with options to evaluate multiple grid interconnection locations; and (6) appurtenant facilities. The proposed project would have an annual generation of 356,839 megawatt-hours.
