SUPPLEMENTARY INFORMATION:

Discussion

A. General Information

The NRC performs periodic reviews of generic communications and withdraws them when they no longer provide useful information or are superseded by

technological innovations or updated guidance. A withdrawal includes the original generic communication and any supplements or revisions. The NRC is currently publishing withdrawals of generic communications on a quarterly basis.

Withdrawal of the original generic communication and supplements, if applicable, will not affect the public's ability to obtain this information. The original generic communication and supplements will remain accessible through ADAMS and the NRC's generic communications Web site. The NRC's generic communications Web site will be updated to reflect the generic communications status as withdrawn. The generic communications Web site is accessible at <https://www.nrc.gov/reading-rm/doc-collections/gen-comm/>.

B. Withdrawals of Generic Communications

The following generic communications are withdrawn:

- Generic Letter (GL) 1978–35, "Regional Meetings to Discuss Upgraded Guard Qualifications," August 25, 1978 (ADAMS Accession No. ML031280394).

The meeting dates of September 27, October 3, October 5, and October 11, 1978, referenced in this GL have passed.

- GL 1978–37, "Revised Meeting Schedule and Locations for Upgraded Guard Qualifications," September 12, 1978 (ADAMS Accession No. ML031280398).

The meeting dates of September 27, October 3, October 5, and October 13, 1978, referenced in this GL have passed.

- GL 1995–08, Revision 1, "10 CFR 50.54(p) Process for Changes to Security Plans Without Prior NRC Approval," April 16, 2014 (ADAMS Accession No. ML14055A356).

This GL was issued to withdraw the original GL 1995–08, dated October 31, 1995. Since the original GL has been withdrawn, there is no longer a need for this revision, and it is also withdrawn.

- Regulatory Issue Summary (RIS) 2013–16, "Interactions Between the NRC and NRC Stakeholders During a Lapse of Agency Appropriations," October 1, 2013 (ADAMS Accession No. ML110550923).

This RIS was issued to inform addressees on how to communicate and interact with NRC during the Federal Government shutdown of 2013. Since the guidance only applied to the Federal Government shutdown of 2013, there is no longer a need for this RIS.

- RIS 2013–16, Supplement 1, "Interactions Between the NRC and NRC Stakeholders During a Lapse of Agency Appropriations," October 9,

2013 (ADAMS Accession No. ML13273A190).

This supplement to RIS 2013–16 was issued to notify addressees that NRC appropriations no longer supported normal operations, and the NRC would be operating at a reduced level. Since the guidance only applied to the Federal Government shutdown of 2013, there is no longer a need for this RIS.

Dated at Rockville, Maryland, this 5th day of June 2017.

For the Nuclear Regulatory Commission.

Alexander D. Garmoe,

Chief (Acting), Generic Communications Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) reviewed an application by the U.S. Department of Energy (DOE) for an amendment to Materials License No. SNM–2512, for the Idaho Spent Fuel Facility independent spent fuel storage installation (ISFSI), located on the Idaho National Engineering Laboratory in Butte County, Idaho. The amendment revises the licensee delegation of authority in the license, the technical specifications, and the final safety analysis report. These documents currently delegate authority under the license to the Manager, DOE Idaho Operations Office. The amendment would replace that reference with the Deputy Manager, Idaho Cleanup Project in each of the documents.

DATES: Notice of issuance of amendment to Materials License No. SNM–2512 given on June 13, 2017.

SUPPLEMENTARY INFORMATION: By letter dated September 8, 2016, DOE submitted to the NRC an application to amend the Materials License No. SNM–2512 for the Idaho Spent Fuel Facility ISFSI, located on the Idaho National Engineering Laboratory in Butte County, Idaho (ADAMS Accession No. ML16258A178). Materials License No. SNM–2512 authorizes the licensee to receive, possess, store, and transfer spent nuclear fuel elements from the Peach Bottom Unit 1 reactor and various TRIGA reactors; reflector modules and rods from the Shippingport reactor; and associated radioactive materials and components related to the fuel elements' receipt, transfer, and storage. The proposed amendment revises the licensee delegation of authority in the license, the technical specifications, and the final safety analysis report.
