FSIS will present information on the upcoming full implementation of the regulatory requirements at official domestic establishments that process Siluriformes fish and fish products, as well as information on entry procedures and reinspection at official import inspection establishments. FSIS is particularly interested in soliciting participation from representatives from domestic wild-caught operations that process Siluriformes fish and fish products.

The primary objectives of the meetings are to provide updated information to stakeholders and to encourage dialogue between FSIS and the Siluriformes fish industry. Affected industry and interested individuals, organizations, and other stakeholders

are invited to participate in the meetings.

Background

On December 2, 2015, FSIS published the final rule to establish a mandatory inspection program for fish of the order

Siluriformes and products derived from these fish (80 FR 75590). The final rule and other resources and information on Siluriformes fish can be found on the FSIS “Inspection Program For Siluriformes Fish, Including Catfish” Web page: <https://www.fsis.usda.gov/wps/portal/fsis/topics/inspection/siluriformes>.

The final rule was effective March 1, 2016; however, the Agency provided an 18-month transitional period until September 1, 2017, to give domestic establishments time to prepare and comply with the final regulations. The transitional period also provided foreign countries with time to submit the documentation necessary to continue exporting Siluriformes fish and fish products to the United States and to show that they have equivalent inspection systems.

FSIS began inspecting domestic establishments on March 1, 2016, and began selecting imported Siluriformes fish shipments for reinspection on April 15, 2016. During the transitional period, FSIS inspection personnel have exercised broad discretion in enforcing the regulatory requirements, focusing primarily on preventing adulterated or misbranded Siluriformes fish and fish products from entering commerce.

FSIS held a series of domestic and import educational meetings when the final rule initially published in December 2015. FSIS has gained significant insight into the domestic and importing Siluriformes fish industries during the transitional period, and is announcing these educational meetings to provide updates regarding full implementation of the regulatory requirements.

In addition, the Agency is interested in exchanging information with operations that process wild-caught Siluriformes fish and fish products, and encourages representatives and parties involved in this industry to attend the educational meetings. The Agency is particularly interested in gaining insight into how the wild-caught Siluriformes fish arrive at processing facilities, from where the wild-caught Siluriformes fish are sourced, daily production volume information for these facilities, and where the final Siluriformes fish and fish products are being sold or distributed after processing. FSIS will post a list of questions that FSIS intends to use to gather information concerning

these issues at <https://www.fsis.usda.gov/meetings>.

SUMMARY: These special conditions are issued for the Textron Model 650 and Beechcraft Model BAe.125 Series 800A (Model 800A) airplanes as modified by Peregrine. These airplanes will have a novel or unusual design feature when compared to the state of technology envisioned in the airworthiness standards for transport-category airplanes. This design feature is rechargeable lithium batteries and battery systems installed in the airplanes. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: This action is effective on Peregrine on June 15, 2017. Send your comments by July 31, 2017.

ADDRESSES: Send comments identified by docket number FAA-2017-0579 using any of the following methods:

SUPPLEMENTARY INFORMATION: The FAA has determined that notice of, and opportunity for prior public comment on, these special conditions is impracticable because these procedures would significantly delay issuance of the design approval and thus delivery of the affected airplanes.

In addition, the substance of these special conditions has been published in the **Federal Register** for public comment in several prior instances with no substantive comments received. The FAA therefore finds it unnecessary to delay the effective date, and finds good cause for making these special conditions effective upon publication in the **Federal Register**.
