   Background

   On May 17, 2017, FSIS published a notice announcing that it will be adjusting its inspection coverage at official Siluriformes fish slaughter establishments, starting September 1, 2017, the date of full enforcement of the regulatory requirements for fish, from all hours of operation to once per production shift. This decision is based on the Agency’s experience inspecting fish slaughter establishments since implementing the mandatory inspection program on March 1, 2016. FSIS requested comment on this decision on or before Aug 15, 2017.

   A consumer advocacy organization requested that FSIS extend the comment period by 30 days, while it researches the implications of the decision, so as to make informed comments. FSIS agrees to extend the comment period. The comment period will now end on July 17, 2017.

[Docket No. FSIS–2017–0016]

Availability of FSIS Compliance Guidelines for Small and Very Small Meat and Poultry Establishments Regarding Lethality and Stabilization in Meat and Poultry Products (Previously Referred to as Appendices A and B)

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice of availability and request for comment.

SUMMARY: The Food Safety and Inspection Service (FSIS) is announcing the availability of and requesting comments on two updated compliance guidelines for small and very small businesses. The new guidelines will assist small and very small meat and poultry establishments understand and comply with the regulatory requirements associated with the destruction of Salmonella and other pathogens (lethality) in ready-to-eat (RTE) products and the control of pathogen growth in heat-treated RTE and not-ready-to-eat (NRTE) products during cooling and hot-holding (stabilization). FSIS is including the time-temperature tables and cooling options in these guidelines that were previously in Appendices A and B, originally made available in 1999, along with new recommendations that can be required for meat and poultry establishments to achieve lethality and stabilization of these products.

DATES: Submit Comments on or before August 15, 2017.

SUMMARY INFORMATION:

Background

FSIS is making available an updated compliance guideline regarding the requirements for the destruction of Salmonella and other pathogens (lethality) in RTE meat and poultry products, entitled FSIS Salmonella Compliance Guideline for Small and Very Small Meat and Poultry Establishments and Revised Appendix A (2017) Compliance Guideline. The updated guideline provides clarification regarding options for establishments to support an alternative lethality (i.e., at least a 5-log reduction of Salmonella, rather than a 6.5-log reduction) for roast, cooked, and corned beef per 9 CFR 318.17(a)(1); a definition of “pasteurization” and guidance on how establishments can label products as “pasteurized”; and updated information gathered from FSIS Food Safety Assessments (FSAs), which are in-depth assessments of establishments’ food safety systems to verify that regulatory requirements are met. The guideline also combines and replaces information from the following previously issued guidance documents:

• Appendix A Compliance Guidelines for Meeting Lethality Performance Standards for certain Meat and Poultry Products.

• Time-Temperature Tables for Cooking Ready-to-Eat Poultry Products.

• FSIS Guidance on Safe Cooking of Non-Intact Meat Chops, Roasts, and Steaks (5-log Table).

FSIS also is making available an updated guideline on the control of pathogen growth in heat-treated RTE and NRTE meat and poultry products during cooling and hot-holding (stabilization), entitled FSIS Compliance Guideline for Stabilization (Cooling and Hot-Holding) of Fully and Partially Heat-Treated RTE and NRTE Meat and Poultry Products Produced by Small with Very Small Establishments and Revised Appendix B. Hot-holding is the process of holding meat and poultry products at hot temperatures (typically above 130°F) prior to distribution. Although stabilization is commonly associated with RTE products, the concepts and many of the recommendations in this guideline can apply to heat-treated NRTE products as well.

This updated stabilization guideline contains recommendations previously found in FSIS Appendix B Compliance Guidelines for Cooling Heat-Treated Meat and Poultry Products (Stabilization) and FSIS Directive 7110.3, Rev. 1, Time/Temperature Guidelines for Cooling Heated Products. It also contains additional guidance not previously found in either document, including:

• The regulatory requirements associated with stabilization (cooling and hot-holding);

• The scientific support documents available to help develop a safe process and product;

• Recommended corrective actions in the event of a cooling deviation; and

• Additional options for cooling meat and poultry products, including requesting a waiver.

Specifically in regard to waivers, this stabilization guideline describes information that establishments may use to request a waiver from the regulatory performance standard in 9 CFR 318.17(a)(2), 318.23(b)(3)(ii)(c), and 381.150(a)(2) to allow up to a 2-log reduction of C. perfringens within a product, provided no multiplication of C. botulinum occurs. The Agency will evaluate waiver requests and use this information to potentially amend the regulations. Notably, FSIS has determined that establishments do not have to provide data that allowing up to 2-log reduction of C. perfringens will result in no multiplication of C. botulinum as part of the waiver request.

Small Business Regulatory Flexibility Act Compliance

Both guidance documents are targeting small and very small establishments in support of the Small Business Administration’s initiative to provide small and very small establishments with compliance assistance under the Small Business Regulatory Flexibility Act (SBRFA). It is important that small and very small establishments have access to the scientific and technical support needed to establish safe and effective HACCP systems. However, all FSIS regulated meat and poultry establishments may be able to apply the recommendations in this guideline.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this Federal Register publication on-line through the FSIS Web page located at: http://www.fsis.usda.gov/federal-register.

FSIS also will make copies of this publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, Federal Register notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The Update is available on the FSIS Web page. Through the Web page, FSIS is able to provide information to a much broader and more diverse audience. In addition, FSIS offers an email subscription service which provides
automatic and customized access to selected food safety news and information. This service is available at: http://www.fsis.usda.gov/subscribe. Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves, and have the option to password-protect their accounts.
