

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R05-OAR-2016-0599; FRL-9963-76-Region 5]

Air Plan Approval; Illinois; Revised Format for Materials Incorporated by Reference

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; administrative change.

SUMMARY: The Environmental Protection Agency (EPA) is revising the format for materials that are made part of the Illinois State Implementation Plan (SIP) through the process of incorporation by reference (IBR). The regulations and materials affected by this format change have all been previously submitted by Illinois and approved by EPA as part of the SIP.

DATES: This action is effective June 30, 2017.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA-R05-OAR-2016-0599. SIP materials which are incorporated by reference into 40 CFR part 52 are available for inspection at the following locations: Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604 and the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

I. Background

A. Description of a SIP

Each state has a SIP containing, among other things, the control measures and strategies used to attain and maintain the national ambient air quality standards (NAAQS). The SIP is extensive, containing such elements as air pollution control regulations, emission inventories, monitoring networks, attainment demonstrations, and enforcement mechanisms.

B. How EPA Enforces SIPs

Each state must formally adopt the control measures and strategies to attain and maintain the NAAQS after the public has had an opportunity to comment on them. The states then submit them to EPA as SIP revision requests upon which EPA must formally act. EPA evaluates these submissions to determine whether they meet CAA requirements. If and when these control measures and strategies are approved by EPA, after notice and comment rulemaking, EPA uses the IBR process to make them part of the Federally approved SIP. IBR is a method of incorporating material into EPA regulations in the CFR by referencing the original document(s) without publishing the full text of the material. In this case, the SIP rules are identified in part 52 (Approval and Promulgation of Implementation Plans), title 40 of the Code of Federal Regulations (40 CFR part 52). These rules are approved by EPA with a specific effective date, but are not reproduced in their entirety in 40 CFR part 52. This format allows both EPA and the public to identify which regulations are contained in a given SIP and to help determine whether the state is enforcing those regulations. This format also assists EPA and the public in taking enforcement action, should a state not enforce its SIP-approved regulations.

C. How the State and EPA Update the SIP

The SIP is periodically revised as necessary to address the unique air pollution problems in the state. Therefore, EPA must periodically take action on state SIP submissions containing new and/or revised regulations and other materials; if approved, they become part of the SIP. On May 22, 1997 (62 FR 27968), EPA

revised the formatting procedures of 40 CFR part 52 for incorporating by reference Federally approved SIP revisions. These procedures include: (1) A revised SIP document for each state that would use the IBR process under the provisions of title 1 CFR part 51; (2) a revised mechanism for announcing EPA approval of revisions to an applicable SIP and updating both the document that has gone through the IBR process and the CFR; and (3) a revised format of the “Identification of plan” sections for each applicable subpart in 40 CFR part 52 to reflect these revised IBR procedures. The description of the revised SIP document, IBR procedures, and “Identification of plan” format are discussed in further detail in the May 22, 1997 **Federal Register** document.

D. How EPA Compiles the SIPs

The Federally-approved regulations, source-specific requirements, and nonregulatory provisions (entirely or portions of) submitted by each state agency have been compiled by EPA into a “SIP compilation.” The SIP compilation contains the updated regulations, source-specific requirements, and nonregulatory provisions approved by EPA through previous rulemaking actions in the **Federal Register**.

E. How EPA Organizes the SIP Compilation

Each SIP compilation contains three parts. Part one contains the regulations, part two contains the source-specific requirements, and part three contains nonregulatory provisions. Each state’s SIP compilation contains a table for each of the three parts that identifies each SIP-approved regulation, source-specific requirement, and nonregulatory provision. In this action, EPA is publishing the SIP compilation tables that summarize the applicable SIP requirements for Illinois and that will be codified at 40 CFR 52.720. The effective dates in the table indicate the date of the most recent revision to an approved regulation. EPA Regional Offices have the primary responsibility for updating the state SIP compilations and ensuring their accuracy.

F. Where You Can Find a Copy of the SIP Compilation

EPA Region 5 has developed and will maintain the SIP compilation for Illinois. A copy of the full text of Illinois’s regulatory and source-specific SIP compilation will also be maintained at NARA.

G. The Format of the New Identification of Plan Section

In order to better serve the public, EPA revised the organization of the section titled "Identification of plan" at 40 CFR 52.720 and included additional information to clarify the enforceable elements of the SIP. The revised format does not affect Federal enforceability of the SIP and is consistent with the requirements of Section 110(h)(1) of the CAA concerning comprehensive SIP publication.

The revised Identification of plan section contains five subsections: (a) Purpose and scope, (b) Incorporation by reference, (c) EPA approved regulations, (d) EPA approved source specific requirements, and (e) EPA approved nonregulatory and quasi-regulatory provisions.

H. When a SIP Revision Becomes Federally Enforceable

All new requirements and revisions to the applicable SIP become Federally enforceable as of the effective date of the revisions to paragraphs (c), (d), or (e) of the applicable Identification of plan section found in each subpart of 40 CFR part 52.

I. The Historical Record of SIP Revision Approvals

To facilitate enforcement of previously approved SIP provisions and provide a smooth transition to the new SIP processing system, EPA will retain the original Identification of plan section, previously appearing in the CFR as the first or second section of part 52 for each state subpart. The original Identification of plan section will be moved to Section 52.750 of part 52 for Illinois. After an initial two-year period, EPA will review its experience with the new SIP processing system and decide whether to retain the original Identification of plan section for some further period.

II. What EPA Is Doing in This Action

We are revising the format of 40 CFR part 52 "Identification of plan" section for Illinois regarding incorporation by reference, by adding Section 52.720(c)(d) and (e), to be consistent with the format described above and in 62 FR 27968 (May 22, 1997). We are adding Section 52.720(b)(1) to further clarify that all SIP revisions listed in Section 52.720(c) and (d), regardless of inclusion in the most recent "update to the SIP compilation," are Federally enforceable under sections 110 and 113 of the Clean Air Act (CAA) as of the effective date of the final rulemaking in which EPA approved the SIP revision. We are adding Section 52.720(b)(2) to

certify that the materials provided by EPA at the addresses in paragraph (b)(3) are an exact duplicate of the official state rules/regulations. We are adding Section 52.720(b)(3) to update address and contact information. Additionally, we are removing sections 52.729 "Control strategy: Carbon monoxide", 52.745 "Section 110(a)(2) infrastructure requirements" and 52.746 "Control strategy: Lead (Pb)" because the information within those sections is being incorporated into the tables at Section 52.720 and is, therefore, no longer necessary.

This action constitutes a recordkeeping and organizational exercise to ensure that all revisions to the state programs that have occurred are accurately reflected in 40 CFR part 52. State SIP revisions are controlled by EPA regulations at 40 CFR part 51.

EPA has determined that this action falls under the "good cause" exemption in sections 553(b)(3)(B) and 553(d)(3) of the Administrative Procedures Act (APA) which, upon finding "good cause," authorizes agencies to dispense with public participation and allows an agency to make a rule effective immediately, thereby avoiding the 30-day delayed effective date otherwise provided for in the APA. This action simply reformats and codifies provisions which are already in effect as a matter of law in Federal and approved state programs. Under section 553(b)(3)(B) of the APA, an agency may find good cause where notice and public procedure are "impractical, unnecessary, or contrary to the public interest." Public comment is unnecessary for this action because EPA is reformatting and codifying existing law. Immediate notice in the CFR benefits the public by removing outdated citations and making the IBR format clearer and more user-friendly.

III. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of the Illinois Regulations described in the amendments to 40 CFR part 52 set forth below. EPA has made, and will continue to make, these documents generally available electronically through www.regulations.gov and/or in hard copy at the appropriate EPA office (see the ADDRESSES section of this preamble for more information).

IV. Statutory and Executive Order Reviews

A. General Requirements

Under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011), this action is not a "significant regulatory action" and is therefore not subject to review by the Office of Management and Budget. This rule is not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866. Because the agency has made a "good cause" finding that this action is not subject to notice-and-comment requirements under the Administrative Procedure Act or any other statute as indicated in the SUPPLEMENTARY INFORMATION section above, it is not subject to the regulatory flexibility provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), or to sections 202 and 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104-4). In addition, this action does not significantly or uniquely affect small governments or impose a significant intergovernmental mandate, as described in sections 203 and 204 of UMRA. This rule also does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant. This rule does not involve technical standards; thus the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. The rule also does not involve special consideration of environmental justice related issues as required by Executive Order 12898 (59 FR 7629, February 16, 1994). In issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct, as required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996).

EPA has complied with Executive Order 12630 (63 FR 8859, March 15, 1998) by examining the takings implications of the rule in accordance with the “Attorney General’s Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings” issued under the executive order. This rule does not impose an information collection burden under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). EPA’s compliance with these statutes and Executive Orders for the underlying rules is discussed in previous actions taken on the State’s rules.

B. Submission to Congress and the Comptroller General

The Congressional Review Act (5 U.S.C. 801 *et seq.*), as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 allows the issuing agency to make a rule effective sooner than otherwise provided by the CRA if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary or contrary to the public interest. This action simply codifies provisions which are already in effect as a matter of law in Federal and approved state programs. 5 U.S.C. 802(2). As stated previously, EPA has made such a good cause finding, including the reasons therefore, and established an effective of June 30, 2017. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. The changes in format to the “Identification of plan” section for Illinois are not a ‘major rule’ as defined by 5 U.S.C. 804(2).

C. Petitions for Judicial Review

EPA has also determined that the provisions of section 307(b)(1) of the Clean Air Act pertaining to petitions for

judicial review are not applicable to this action. Prior EPA rulemaking actions for each individual component of the Illinois SIP compilations had previously afforded interested parties the opportunity to file a petition for judicial review in the United States Court of Appeals for the appropriate circuit within 60 days of such rulemaking action. Thus, EPA sees no need in this action to reopen the 60-day period for filing such petitions for judicial review for these “Identification of plan” reorganization actions for Illinois.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxide, Volatile organic compounds.

Dated: June 5, 2017.

Robert A. Kaplan,

Acting Regional Administrator, Region 5.

Part 52 of chapter I, title 40 of the Code of Federal Regulations, is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart O—Illinois

§ 52.720 [Redesignated as § 52.750 and amended]

■ 2. Section 52.720 is redesignated as § 52.750 and the section heading and paragraph (a) are revised to read as follows:

§ 52.750 Original identification of plan section.

(a) This section identified the original “Air Quality Implementation Plan for the State of Illinois” and all revisions submitted by Illinois that were Federally-approved prior to June 1, 2017.

* * * * *

■ 3. A new § 52.720 is added to read as follows:

§ 52.720 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for the State of Illinois under section 110 of the Clean Air Act, 42 U.S.C. 7401–7671q and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.*

(1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to December 31, 2016, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Entries in paragraphs (c) and (d) of this section with the EPA approval dates after December 31, 2016, have been approved by EPA for inclusion in the State implementation plan and for incorporation by reference into the plan as it is contained in this section, and will be considered by the Director of the Federal Register for approval in the next update to the SIP compilation.

(2) EPA Region 5 certifies that the materials provided by EPA at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated state rules/regulations which have been approved as part of the state implementation plan as of the dates referenced in paragraph (b)(1).

(3) Copies of the materials incorporated by reference into the SIP may be inspected at the Region 5 EPA Office at 77 West Jackson Boulevard, Chicago, IL 60604. To obtain the material, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble. You may also inspect the material with an EPA approval date prior to June 1, 2017, at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.
