FOR FURTHER INFORMATION CONTACT: Dr. Jim Seger, Pacific Council; telephone: (503) 820–2416.

SUPPLEMENTARY INFORMATION: The primary purpose of the CAB meeting is to develop preliminary ranges of alternatives for Pacific Council consideration at the September 2017 Pacific Council meeting. The issues to be covered were identified by the Pacific Council at its June 2017 meeting and include: Meeting the at-sea whiting fishery bycatch needs; trawl sablefish area management (gear conflicts); shoreside individual fishing quota (IFQ) accumulation limit; shoreside IFQ choke species management; shoreside IFQ gear switching limitation; and catcher-processor sector accumulation limits on permit ownership and harvesting/processing. Ranges of alternatives are to be developed and finalized for analysis over the course of the September and November Pacific Council meetings. Due to workload limitations, it is unlikely that all of these issues will move forward in 2017.

Although nonemergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this

document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection. The For-Hire Telephone Survey (FHTS) is conducted for the National Marine Fisheries Service (NMFS) to estimate fishing effort and catch on for-hire vessels (*i.e.*, charter boats and head boats). These data are required to carry out provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), as amended, regarding conservation and management of fishery resources.

NOAA Fisheries designed and implemented the FHTS to collect fishing effort information from for-hire vessel representatives through log sheet submission, the internet, or by telephone interview. For-hire vessels are randomly selected for the FHTS from a comprehensive sample frame developed and maintained by NMFS. A sample of 10% of the vessels on the FHTS frame are selected for reporting each week. Each interview collects information about the vessel, the number and type of trips the vessel made during the reporting week, the number of anglers on each trip, and other trip-level information.

The FHTS estimates are combined with estimates derived from independent but complementary surveys of fishing trips, the Access-Point Angler Intercept Survey, to estimate total, state-level fishing catch, by species. These estimates are used in the development, implementation, and monitoring of fishery management programs by the NMFS, regional fishery management councils, interstate marine fisheries commissions, and state fishery agencies.

II. Method of Collection

Information will be collected through telephone interviews using a Computer Assisted Telephone Interviewing (CATI) System. In lieu of telephone interviews, respondents may also provide information by submitting a log sheet or participating in the survey online.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.
