SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Manufactured Home Construction and Safety Standards Act Reporting.

OMB Approval Number: 2502-0253.

Type of Request: Revision.

Form Number: None.

Description of the Need for the Information and Proposed Use: The Federal Standards and Procedural Regulations require manufactured home producers to place labels and notices in and on manufactured homes and mandate State and Private agencies participating in the Federal program to issue reports. Under revisions to the current reporting requirements and Regulations, a streamlined procedure has been added that will allow manufacturers, under certain circumstances, to complete construction of their homes on-site rather than in the factory without first having to obtain advance approval from HUD. In addition, some information collected assists both HUD and State Agency's in locating manufactured homes with defects, which then would create the need for notification and/or correction by the manufacturer.

Respondents (i.e. affected public): Business or other for-profit.

Estimated Number of Respondents: 182.

Estimated Number of Responses: 105,479.

Frequency of Response: Monthly.

Average Hours per Response: 1.5.

Total Estimated Burdens: 147,515.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on

the following: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Date: June 9, 2017.

General Deputy Assistant Secretary for Housing.

Coniferous wood, sawn, or chipped lengthwise, sliced or peeled, whether or not planed, whether or not sanded, or whether or not finger-jointed, of an actual thickness exceeding six millimeters.

Coniferous wood siding, flooring, and other coniferous wood (other than moldings and dowel rods), including strips and friezes for parquet flooring, that is continuously shaped (including, but not limited to, tongued, grooved, rebated, chamfered, V-jointed, beaded, molded, rounded) along any of its edges, ends, or faces, whether or not planed, whether or not sanded, or whether or not end-jointed.

Although these HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of these investigations is dispositive.

The scope of the order excludes the following items: U.S.-origin lumber shipped to Canada for processing and imported into the United States is excluded from the scope of the investigations if the processing occurring in Canada is limited to one or more of the following: (1) Kiln drying; (2) planing to create smooth-to-size board; or (3) sanding. Box-spring frame kits are excluded if they contain the following wooden pieces—two side rails, two end (or top) rails and varying numbers of slats. The side rails and the end rails must be radius-cut at both ends. The kits must be individually packaged and must contain the exact number of wooden components needed to make a particular box spring frame, with no further processing required. None of the components exceeds 1” in actual thickness or 83” in length. Radius-cut box-spring-frame components, not exceeding 1” in actual thickness or 83” in length, ready for assembly without further processing are excluded. The radius cuts must be present on both ends of the boards and must be substantially cut so as to completely round one corner.

Background.—The final phase of these investigations is being scheduled pursuant to sections 705(b) and 731(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 1673d(b)), as a result of affirmative preliminary determinations by the Department of Commerce that certain benefits which constitute subsidies within the meaning of section 703 of the Act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in Canada of
