

currently scheduled for Autumn 2017–Winter 2018) are appropriately addressed, (b) advising Chapter Leads how to handle contentious issues, and (c) ensuring that significant scientific uncertainties are reflected adequately in the text of NCA4. Review Editors do not provide additional comments on assigned draft chapters; rather, they ensure each and every comment has been considered by the author team, and that the ‘annotation’ (*i.e.*, written responses to comments) is responsive to the comment and indicates any revision made to the chapter(s), including the scientific or logical rationale for said action.

Potential nominees should be accomplished scientists and/or science communicators with climate-related proficiency in at least one of the regions, sectors, or responses topics outlined in the NCA4 Outline, (described below in the Appendix and accessible via <http://www.globalchange.gov/content/nca4-outline>). Nominees must have demonstrated technical expertise such that the nominees could contribute to the development of a robust scientific, technical assessment as subject matter experts in one or more of the topics listed in the outline.

Responses to this request for nominations for Review Editors must be submitted by September 8, 2017. Users can access the nominations form via (<https://contribute.globalchange.gov/>). Interested persons may nominate themselves or third parties, and may nominate more than one person. Each nomination must include: (1) The nominee’s full name, title, institutional affiliation, and contact information; (2) the desired chapter(s) the nominee wishes to serve as Review Editor on (*i.e.*, area(s) of expertise); and (3) a short description of his/her qualifications relative to contributing to the report. Nominees are encouraged to submit a CV of no more than 4 pages for optimal consideration.

More information on the function of Review Editors, the tasks (including reporting) expected of them, as well as the tentative dates of commitment can be found at <https://contribute.globalchange.gov>.

SUPPLEMENTARY INFORMATION: The SRWCW was formed in November 2015 and tasked with exploring and evaluating alternative fishery management frameworks for Sacramento River winter Chinook. The SRWCW first met in 2016 and identified three areas of focus: (1) Develop methods for forecasting abundance, (2) develop a suite of alternative control rules and (3) evaluate the performance of these control rules with regard to conservation benefits and fishery costs using a Management Strategy Evaluation (MSE) approach. Since 2016 the group has addressed these tasks and provided progress reports to the Council as information was available. At this webinar, the SRWCW will focus the discussion on the results of the MSE. The SAS will attend to provide input and feedback to the SRWCW. The SRWCW is tentatively scheduled to present preliminary MSE results to the Pacific Fishery Management Council in September 2017, and provide final MSE results in November 2017. The SRWCW may also discuss materials and reports for the Council's September 2017 meeting, and any future meeting plans.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.
