

deadline. Further information is provided in the Filing Instructions Public Notice.

15. Each applicant has a continuing obligation to maintain the accuracy and completeness of information furnished in its pending FCC Form 175, including any change that may cause a loss of or reduction in the percentage of bidding credit requested previously. An auction applicant must file additional or corrected information within five days after a significant occurrence or amend its FCC Form 175 no later than five days after the applicant becomes aware of the need for amendment. An applicant's obligation to make modifications to a pending FCC Form 175 continues after these five days. An applicant is obligated to amend its pending application even if a reported change is considered to be a major modification that may result in the dismissal of its application.

16. Prospective applicants should study carefully the explanations in the Filing Instructions Public Notice concerning prohibited communication by an auction applicant contained in sections 1.2105(c) and 73.5002. For example, an applicant is defined in section 1.2105(c) for purposes of these prohibitions to include each officer and each director of the applicant, each controlling interest of the applicant, and each holder of an ownership interest in the applicant of 10 percent or more. The Filing Instructions Public Notice provided further details concerning an impermissible communication, including a reminder of the duty to report immediately a communication that appears to violate section 1.2105(c). If mutual exclusivity (MX) is determined to exist for any engineering proposals submitted during this filing window, the Bureaus will announce a subsequent period during which this prohibition will be suspended for the purpose of resolving MX conflicts. Until such time, however, these prohibited communication rules remain in effect for Auction 99 from 6:00 p.m. on August 2, 2017, until the down payment deadline which will be announced in a future public notice.

17. If any FM translator engineering proposals filed during this announced window are determined to be MX and such MX is not resolved through a future opportunity for settlement or technical amendment, the Commission will resolve MX engineering proposals for commercial stations through competitive bidding.

Federal Communications Commission.

Sue McNeil,

Chief of Staff/Special Counsel, Wireless Telecommunications Bureau.

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 161017970-6999-02]

RIN 0648-XF550

Fisheries of the Northeastern United States; Summer Flounder Fishery; Commercial Quota Harvested for the Commonwealth of Massachusetts

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS announces that the 2017 summer flounder commercial quota allocated to the Commonwealth of Massachusetts has been harvested. Vessels issued a commercial Federal fisheries permit for the summer flounder fishery may not land summer flounder in Massachusetts for the remainder of calendar year 2017, unless additional quota becomes available through a transfer from another state. Regulations governing the summer flounder fishery require publication of this notification to advise Massachusetts that the quota has been harvested and to advise vessel permit holders and dealer permit holders that no Federal commercial quota is available for landing summer flounder in Massachusetts.

DATES: Effective 0001 hours, July 20, 2017 through December 31, 2017.

FOR FURTHER INFORMATION CONTACT: Cynthia Hanson, (978) 281-9180, or Cynthia.Hanson@noaa.gov.

SUPPLEMENTARY INFORMATION: Regulations governing the summer flounder fishery are found at 50 CFR part 648. The regulations require annual specification of a commercial quota that is apportioned on a percentage basis among the coastal states from Maine through North Carolina. The process to set the annual commercial quota and the percent allocated to each state is described in § 648.102.

The initial commercial quota for summer flounder for the 2017 calendar year was set equal to 5,658,260 lb

(2,566,544 kg) (81 FR 93842, December 22, 2016). The percent allocated to vessels landing summer flounder in Massachusetts is 6.82046 percent, resulting in a commercial quota of 385,988 lb (175,081 kg). Massachusetts has not received any quota transfers in 2017 that would cause the initial commercial quota to be adjusted.

The NMFS Administrator for the Greater Atlantic Region (Regional Administrator), monitors the state commercial landings and determines when a state's commercial quota has been harvested. NMFS is required to publish notification in the **Federal Register** advising and notifying commercial vessels and dealer permit holders that, effective upon a specific date, the state's commercial quota has been harvested and no commercial quota is available for landing summer flounder in that state. The Regional Administrator has determined, based upon dealer reports and other available information, that the 2017 Massachusetts commercial summer flounder quota will be harvested by July 19, 2017.

Section 648.4(b) provides that Federal permit holders agree, as a condition of the permit, not to land summer flounder in any state that the Regional Administrator has determined no longer has commercial quota available. Therefore, effective 0001 hours, July 20, 2017, landings of summer flounder in Massachusetts by vessels holding summer flounder commercial Federal fisheries permits are prohibited for the remainder of the 2017 calendar year, unless additional quota becomes available through a transfer and is announced in the **Federal Register**. Effective 0001 hours, July 20, 2017, federally permitted dealers are also notified that they may not purchase summer flounder from federally permitted vessels that land in Massachusetts for the remainder of the calendar year, or until additional quota becomes available through a transfer from another state.

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

The Assistant Administrator for Fisheries, NOAA, finds good cause pursuant to 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment because it would be contrary to the public interest. This action closes the commercial summer flounder fishery for Massachusetts until January 1, 2018, under current regulations. The regulations at § 648.103(b) require such action to

ensure that summer flounder vessels do not exceed quotas allocated to the states. If implementation of this closure was delayed to solicit prior public comment, the quota for this fishing year will be exceeded, thereby undermining the conservation objectives of the Summer

Flounder Fishery Management Plan. The Assistant Administrator further finds, pursuant to 5 U.S.C. 553(d)(3), good cause to waive the 30-day delayed effectiveness period for the reason stated above.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 17, 2017.

Emily H. Menashes,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
