SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On May 22, 2017, DOE received an application from the Applicant for authority to transmit electric energy from the United States to Mexico as a power marketer for a five-year term using existing international transmission facilities.

In its application, the Applicant states that it does not own or control any electric generation or transmission facilities, and it does not have a franchised service area. The electric energy that the Applicant proposes to export to Mexico would be surplus energy purchased from third parties such as electric utilities and Federal power marketing agencies pursuant to voluntary agreements. The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential Permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural matters: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of Practice and Procedures (18 CFR 385.211). Any person desiring to become a party to these proceedings should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214). Five copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments and other filings concerning the Applicant's application to export electric energy to Mexico should be clearly marked with OE Docket No. EA-437. An additional copy is to be provided to Fernando Miller, EnerTime Energy Resources, LLC, 700 Milam, Suite 1300, Houston, TX 77002.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy

Act Implementing Procedures (10 CFR part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program Web site at <http://energy.gov/node/11845>, or by emailing Angela Troy at Angela.Troy@hq.doe.gov.

Office of Energy Efficiency and Renewable Energy

[Case Numbers EPS-001, EPS-002, EPS-003 and EPS-004]

Notice of Petition for Waiver of Apple, Inc., Microsoft Corporation, Poin2 Lab, and Hefei Bitland Information Technology Co., Ltd. From the Department of Energy External Power Supplies Test Procedure and Grant of Interim Waiver

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of petitions for waiver, granting of interim waiver, and request for public comment.

SUMMARY: This notice announces receipt of and publishes petitions for waivers from Apple, Inc. ("Apple"), Microsoft Corporation ("Microsoft"), Poin2 Lab ("Poin2"), and Hefei Bitland Information Technology Co., Ltd. ("Bitland") (collectively, "the petitioners") seeking an exemption from specific portions of the U.S. Department of Energy's ("DOE's") test procedure for determining external power supply ("EPS") energy efficiency. The waiver requests pertain to adaptive EPSs that support a particular International Electrotechnical Commission standard. Under the existing DOE test procedure, the average active mode efficiency of an adaptive EPS must be tested at both its lowest and highest achievable output voltages. The petitioners contend that since their products operate above 2 amps current at the lowest achievable output voltages under rare conditions and for only brief periods of time, the suggested alternative testing approach detailed in their waiver petition requests is needed to measure the active mode efficiency of their products in a representative manner. DOE is granting the petitioners with an interim waiver from the DOE EPS test procedure for the specified basic models of EPSs, subject to use of the alternative test procedure as set forth in this document and is

soliciting comments, data, and information concerning the petitions and the suggested alternate test procedure.

DATES: DOE will accept comments, data, and information with regard to the petition until August 23, 2017.
