

process, no individual will be allowed on the return side until the mine-through has been completed and the area has been examined and declared safe. The shearer must be idle when any miners are in by the tail drum.

(h) When using continuous or conventional mining methods, the working place will be free from accumulations of coal dust and coal spillages, and rock dust will be placed on the roof, rib, and floor to within 20 feet of the face when mining through the well or branch. On longwall sections, rock dust will be applied on the roof, rib, and floor up to both the headgate and tailgate pillared area.

(i) Immediately after the well or branch is intersected, the operator will de-energize all equipment, and the certified person will thoroughly examine and determine the working place safe before mining is resumed.

(j) After a well or well branch has been intersected and the working place determined safe, mining will continue in by the well a sufficient distance to permit adequate ventilation around the area of the well or branch.

(k) No open flame will be permitted in the area until adequate ventilation has been established around the wellbore or branch. Any casing, tubing or stuck tools will be removed using the methods approved in the mine ventilation plan.

(l) No person will be permitted in the working place of the mine-through operation during active mining except those persons actually engaged in the mining operation, including mine management, representatives of miners, personnel from MSHA, and personnel from the appropriate State agency.

(m) The mine operator will warn all personnel in the mine of the planned intersection of the well or branch prior to their going underground if the planned intersection is to occur during their shift. This warning will be repeated for all shifts until the well or branch has been intersected.

(n) A certified official will directly supervise the mine-through operation and only the certified official in charge will issue instructions concerning the mine-through operation.

(o) All miners will be in known locations and will stay in communication with the responsible person, in accordance with the site specific approved emergency response plan when active mining occurs within the minimum working barrier of the well or branch.

(p) The responsible person required in 30 CFR 75.1501 is responsible for well intersection emergencies. The well intersection procedures must be

reviewed by the responsible person prior to any planned intersection.

(q) A copy of the approved petition will be maintained at the mine and be available to the miners.

(r) The provisions of the approved petition do not impair the authority of representative of MSHA to interrupt or halt the mine-through operation and to issue a withdrawal order when its deemed necessary for the safety of the miners. MSHA may order an interruption or cessation of the mine-through operation and/or withdrawal of personnel by issuing either a verbal or a written order to that effect to a representative of the operator, and will include the basis for the order. Operations in the affected area of the mine may not resume until a representative of MSHA permits resumption of mine-through operations. The miner operator and miners will comply with verbal or written MSHA orders immediately. All verbal orders will be committed to in writing within a reasonable time as conditions permit.

(s) For subsequent intersections of branches of a well, appropriate procedures to protect the miners will be specified in the mine ventilation plan.

d. The petitioner proposes to use the following mandatory procedures after SDD intersections:

(1) All intersections with SDD wells and branches that are in intake air courses will be examined as part of the pre-shift examinations required in 30 CFR 75.360.

(2) All other intersections with SDD wells and branches will be examined as part of the weekly examinations required in 30 CFR 75.364.

Within 30 days after this petition becomes final, the petitioner will submit proposed revisions for its approved Part 48 training plan to the DM. These proposed revisions will include initial and refresher training regarding compliance with the terms and conditions stated in the petition. The mine operator will provide all miners involved in the mine-through of a well or branch with training regarding the requirements of this petition prior to mining within the minimum working barrier of the next well or branch intended to be mined through.

Within 30 days after this petition becomes final, the petitioner will submit proposed revisions for its approved mine emergency evacuation and firefighting program of instruction required in 30 CFR 75.1502. The mine operator will revise the program to include the hazards and evacuation procedures to be used for well intersections. All underground miners will be trained in the revised program

within 30 days of the approval of the revised mine emergency evacuation and firefighting program of instruction.

The petitioner asserts that the proposed alternative method will always guarantee the miners no less than the same measure of protection afforded by the standard.

Sheila McConnell,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520-43-P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: 17-053]

Notice of Intent To Hold International Space Station Stakeholder Workshop

AGENCY: National Aeronautics and Space Administration.

ACTION: Stakeholder workshop.

SUMMARY: The International Space Station (ISS) Stakeholder Workshop is intended to engage ISS stakeholders in gathering information that may be used in the development of NASA's future ISS planning activities. Specifically, the workshop targets the commercial space sector, researchers, technology developers, transportation and habitation providers, other government agencies, and other interested parties, providing a forum for dialogue with NASA on topics relevant to ISS future planning. Topics for discussion include the low Earth orbit (LEO) commercial, research, and development market; access to space; the value of permanent human habitation in LEO; and structure and planning for public/private partnerships in LEO.

DATES: Wednesday, August 9, 2017, 8:30am-6:00pm, Local Time.

ADDRESSES: Marriott Marquis Washington DC, 901 Massachusetts Ave NW., Washington, DC 20001. Please see the workshop Web site at: <https://www.nasa.gov/content/international-space-station-stakeholder-workshop>.

FOR FURTHER INFORMATION CONTACT: Jacob Keaton, 202-358-1507, hq-iss-leo@mail.nasa.gov.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the room. Attendees are requested to register at: <https://www.nasa.gov/content/international-space-station-stakeholder-workshop>. The agenda will consist of a plenary session in the morning followed by topic-specific breakouts in the afternoon.

Tentative ISS Stakeholder Workshop Agenda

8:30–12:00 Open Session. Welcome, Objectives, Presentations.
 12:00–1:00 Lunch (on your own)
 1:00–3:00 Breakout Sessions Round #1
 3:00–5:00 Breakout Sessions Round #2
 5:00–6:00 Outbriefs and Summary

Jacob Keaton,

International Space Station, NASA Headquarters.

NUCLEAR REGULATORY COMMISSION

[NRC–2017–0001]

Sunshine Act Meeting Notice

DATE: Weeks of July 24, 31, August 7, 14, 21, 28, 2017.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Public and Closed.

Week of July 24, 2017

There are no meetings scheduled for the week of July 24, 2017.

Week of July 31, 2017—Tentative

There are no meetings scheduled for the week of July 31, 2017.

Week of August 7, 2017—Tentative

There are no meetings scheduled for the week of August 7, 2017.

Week of August 14, 2017—Tentative

There are no meetings scheduled for the week of August 14, 2017.

Week of August 21, 2017—Tentative

There are no meetings scheduled for the week of August 21, 2017.

Week of August 28, 2017—Tentative

There are no meetings scheduled for the week of August 28, 2017.

NUCLEAR REGULATORY COMMISSION

[Docket No. 040–7580; EA–17–102; NRC–2017–0165]

License Modification Order: Fansteel, Inc. and FMRI (a Subsidiary of Reorganized Fansteel)

AGENCY: Nuclear Regulatory Commission.

ACTION: Order; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an Immediately Effective Order to Fansteel, Inc. and FMRI (a subsidiary of Reorganized Fansteel). The Order modifies License No. SMB–911 to include “Fansteel, Inc.” as a co-Licensee with “FMRI (a subsidiary of Fansteel)” for the complex decommissioning site in Muskogee, Oklahoma. The Order also requires amendment of the Decommissioning Plan to reflect “Fansteel” as a co-licensee and requires Fansteel and FMRI to take any and all actions necessary at the Muskogee site to ensure adequate protection of public health and safety. The NRC issued the

Order in response to the imminent risk that FMRI will abandon the Muskogee site.

DATES: The Order was issued on July 14, 2017.

ADDRESSES: Please refer to Docket ID NRC–2017–0165 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC–2017–0165. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: Carol.Gallagher@nrc.gov. For questions about this Order, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Greg Chapman, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–8718; email: Gregory.Chapman@nrc.gov.

SUPPLEMENTARY INFORMATION: The text of the Order is attached.

Dated at Rockville, Maryland, this July 17, 2017.

For the Nuclear Regulatory Commission.

John R. Tappert,

Director, Division of Decommissioning, Uranium Recovery, and Waste Programs Office of Nuclear Material Safety and Safeguards.
