The instrument will be able to accurately adjust the M1 Mirror optical surface by applying arbitrary Zernike correction terms to correct for telescope errors in addition to polishing errors and M1 Cell Assembly induced errors. After optics correction, the total allowed M1 Mirror optical surface figure error from all sources other than polishing residuals shall be less than 45 nm RMS after subtraction of tip tilt and focus.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This request is for extension of a current information collection.

For a person to participate in Federal fisheries, the National Marine Fisheries Service (NMFS) requires a Federal Fisheries Permit (FFP), a Federal Processor Permit (FPP), or an Exempted Fishing Permit (EFP). NMFS Alaska Region created a set of commercial fishing permits that operators of vessels and managers of processors must have on board or on site when fishing, receiving, buying, or processing groundfish and non-groundfish species. The permit information provides harvest gear types; descriptions of vessels, shoreside processors, and stationary floating processors; and expected fishery activity levels. These

permits provide NMFS with a way to monitor participation in Federal fisheries.

Section 303(b)(1) of the Magnuson-Stevens Act specifically recognizes the need for permit issuance. The requirement of a permit for marine resource users is one of the regulatory steps taken to carry out conservation and management objectives. The issuance of a permit is an essential ingredient in the management of fishery resources needed for identification of the participants, expected activity levels, and for regulatory compliance (e.g., withholding of permit issuance pending collection of unpaid penalties).

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This request is for extension of a current information collection.

On October 21, 1998, the President signed into law The American Fisheries Act, 16 U.S.C. 1851 (AFA). The AFA authorizes the formation of fishery cooperatives in all sectors of the Bering Sea and Aleutian Islands Management Area (BSAI) pollock fishery, grants antitrust exemptions to cooperatives in the mothership sector, and imposes operational limits on fishery cooperatives in the BSAI pollock fishery. The National Marine Fisheries Service (NMFS) issues a single pollock allocation to each cooperative, and the cooperative may make sub-allocations of pollock to each individual vessel owner in the cooperative.

With respect to the fisheries off Alaska, the AFA Program is a suite of management measures that fall into four general regulatory categories:

- Limit access into the fishing and processing sectors of the BSAI pollock fishery and that allocate pollock to such sectors (50 CFR 679.64).
- Govern the formation and operation of fishery cooperatives in the BSAI pollock fishery, including filing of cooperative contracts (50 CFR 679.61 and 679.62).
- Protection of other fisheries from spillover effects from the AFA (50 CFR 679.64).
- Govern catch measurement and monitoring in the BSAI pollock fishery, including filing of annual reports and completing and submitting inshore catcher vessel pollock cooperative catch reports (50 CFR 679.63).
