SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

The License Limitation Program (LLP) restricts access to the commercial groundfish fisheries, commercial crab fisheries, and commercial scallop fisheries in the Exclusive Economic Zone off Alaska except for certain areas where alternative programs exist. The intended effect of the LLP is to limit the number of participants and reduce fishing capacity in fisheries off Alaska.

For a vessel designated on an LLP license, the LLP license authorizes the type of fishing gear that may be used by the vessel, the maximum size of the vessel, an area endorsement, and whether the vessel may catch and process fish at sea or if it is limited to delivering catch without at-sea processing. LLP licenses that allow vessels to catch and process at-sea are assigned a catcher/processor endorsement. LLP licenses specify the maximum length overall (MLOA) of the vessel to which that LLP license may be assigned. The LLP may also include a species endorsement for Pacific cod in the Bering Sea and Aleutian Islands management area (BSAI) and Gulf of Alaska (GOA).

An LLP license is required for vessels participating in directed fishing for LLP groundfish species in the BSAI or GOA, or fishing in any BSAI LLP crab fisheries. An LLP license is also required for any vessel deployed in scallop fisheries in Federal waters off Alaska (except for some diving operations).

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

The Crab Rationalization Program (CRP) allocates Bering Sea and Aleutian Islands (BSAI) crab resources among harvesters, processors, and coastal communities through a limited access system that balances the interests of these groups who depend on these fisheries.

The Crab Rationalization Program Arbitration System (CRPAS) is a series of steps that harvesters and processors can use to negotiate delivery and price contracts. The Arbitration System allows unaffiliated Class A individual fishing quota holders to initiate an arbitration proceeding in the event of a dispute to allow an independent third party to provide a review of harvester and processor negotiation positions and provide an independent and binding resolution to issues under dispute. To use the arbitration system, a harvester must commit deliveries to a processor and initiate a binding arbitration proceeding in advance of the season opening. The Arbitration System is designed to minimize antitrust risks for crab harvesters and processors and is intended to ensure that a reasonable price is paid for all landings.

Under permit application 20571 the Service proposes to collect Central Valley spring-run Chinook salmon from Butte Creek to use as broodstock, which was not authorized by the previous permits. As part of this permit application, the Service has submitted an HGMP as an attachment to the application. This notice advises the public that the permit application and associated HGMP are available for review and comment, prior to a determination by NOAA's National Marine Fisheries Service (NMFS) on the issuance of the permit. The permit application, and attached HGMP, may

be viewed online at: https://apps.nmfs.noaa.gov/preview/preview_open_for_comment.cfm.

DATES: Comments or requests for a public hearing on the application must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific standard time on August 28, 2017.
