

**DEPARTMENT OF LABOR****Bureau of Labor Statistics****Information Collection Activities;  
Comment Request**

**AGENCY:** Bureau of Labor Statistics, Department of Labor.

**ACTION:** Notice of information collection; request for comment.

**SUMMARY:** The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed extension of "Cognitive and Psychological Research." A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

**DATES:** Written comments must be submitted to the office listed in the **ADDRESSES** section of this notice on or before October 2, 2017.

**ADDRESSES:** Send comments to Nora Kincaid, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue NE., Washington, DC 20212. Written comments also may be transmitted by fax to 202-691-5111 (this is not a toll free number).

**FOR FURTHER INFORMATION CONTACT:** Nora Kincaid, BLS Clearance Officer, telephone number 202-691-7628 (this is not a toll free number). (See **ADDRESSES** section.)

**SUPPLEMENTARY INFORMATION:****I. Background**

The Bureau of Labor Statistics' Behavioral Science Research Center (BSRC) conducts theoretical, applied, and evaluative research aimed at improving the quality of data collected and published by the Bureau. Since its creation in 1988, the BSRC has advanced the study of survey methods research, approaching issues of non-sampling error within a framework that

draws heavily on the theories and methods of the cognitive, statistical, and social sciences. The BSRC research focuses primarily on the assessment of survey instrument design and survey administration, as well as on issues related to interviewer training, the interaction between interviewer and respondent in the interview process, and the usability of data-collection instruments by both interviewers and respondents. Improvements in these areas result in greater accuracy and response rates of BLS surveys, frequently reduce costs in training and survey administration, and further ensure the effectiveness of the Bureau's overall mission.

**II. Current Action**

Office of Management and Budget clearance is being sought for "Cognitive and Psychological Research." The purpose of this request for clearance by the BSRC is to conduct cognitive and psychological research designed to enhance the quality of the Bureau's data collection procedures and overall data management. The BLS is committed to producing the most accurate and complete data within the highest quality assurance guidelines. The BSRC was created to aid in this effort and it has demonstrated the effectiveness and value of its approach. Over the next few years, demand for BSRC consultation is expected to remain high as approaches are explored and tested for dealing with increasing nonresponse in key Bureau surveys. Moreover, as the use of web-based surveys continues to grow, so too will the need for careful tests of instrument design and usability, human-computer interactions, and the impact of multiple modes on data quality. The BSRC is uniquely equipped with both the skills and facilities to accommodate these demands.

The extension of the accompanying clearance package reflects an attempt to accommodate the increasing interest by BLS program offices and other agencies in the methods used, and the results obtained, by the BSRC. This package reflects planned research and development activities for FY2018 through FY2020, and its approval will enable the continued productivity of a state-of-the-art, multi-disciplinary program of behavioral science research to improve BLS survey methodology.

**III. Desired Focus of Comments**

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the

functions of the agency, including whether the information will have practical utility.

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
