

within the riparian reserve area outside of that 50 feet.

Shaded fuel breaks would be created along about 28 miles of road. The fuel break would remove conifers less than 7" DBH and ladder fuels up to 150 feet on either side of the road. This would result in up to 1,033 acres of shaded fuel breaks although 216 of these acres overlaps with other proposed treatment stands.

Log placement would occur at eight locations along lower Calf Creek. The failing sump along Forest Service road 4750-200 would be restored to a series of three small wetlands. The small earthen dam would be removed and the new wetlands contoured in to take its place.

The wetland at Little Oak Flats that is currently being drained by Forest Service road 4770-030 would be restored to retain approximately its natural hydrologic state. About six miles of road would be decommissioned, including the last 1.7 miles of Forest Service road 2801 that follows Copeland Creek.

About 13 miles of road have been identified as not currently needed or expected to be needed within the next twenty years. These would be put into storage that would include pulling the culverts such that they would no longer be drivable. Of these, about 10 miles would be closed to all vehicle traffic while about three miles would still be accessible to motorized vehicles under 50" in width.

North Umpqua District Ranger.

Nature of Decision To Be Made

The deciding officer will decide whether to implement the proposed action, take an alternative action that meets the purpose and need or take no action.

Preliminary Issues

Preliminary issues include vegetation management in areas designated as Late Seral Reserves under the Northwest Forest Plan as well as vegetation management in designated critical habitat for the threatened northern spotted owl. Management of the road system is an issue that has been identified for this project area. Noncommercial vegetation management in inventoried roadless areas and areas that are currently undeveloped is also an issue for this project.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental

impact statement. Public meetings and field trips will be planned for the summer of 2017. These meetings will be announced in the Roseburg News Review and the Umpqua National Forest Web page.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however.

Dated: July 19, 2017.

Jeanne M. Higgins,

Acting Associate Deputy Chief, National Forest System.
