Pabrik Kertas Tjiwi Kirnja Tbk, and Pindo Deli Pulp and Paper Mills (PD) (collectively, APP); and (2) PT Anugerah Kertas Utama, PT Riau Andalan Kertas, and APRIL Fine Paper Macao Offshore Limited (collectively APRIL).<sup>2</sup> Based upon these requests, on May 9, 2017, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), the Department published a notice of initiation of an administrative review covering the period August 26, 2015, through February 28, 2017, with respect to two companies.<sup>3</sup> On June 12, 2017, APP withdrew its request for an administrative review.

##### Partial Rescission

Pursuant to 19 CFR 351.213(d)(1), the Secretary will rescind an administrative review, in whole or in part, if a party who requested the review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review. #### Atlantic Highly Migratory Species; Exempted Fishing Permits

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of availability of a final environmental assessment to issue an exempted fishing permit.

**SUMMARY:** NMFS announces the availability of a Final Environmental Assessment (EA) analyzing the impacts of issuing an exempted fishing permit (EFP) to Dr. David Kerstetter of Nova Southeastern University to evaluate pelagic longline (PLL) catch and bycatch rates from within two different sub-areas in the northern portion of the East Florida Coast (EFC) Pelagic Longline

(PLL) Closed Area (north and south of 29°50' N. lat.) and compare those rates to rates obtained by authorized samplers from an area outside the EFC PLL Closed Area, with certain terms and conditions. The overall purpose of the research project is to evaluate the effectiveness of existing area closures at meeting current conservation and management goals under current conditions using standardized PLL gear on a specified number of commercial vessels. In response to terms and conditions established by NMFS, the research project is also structured to maximize the survival of shark species, collect data on shark species identification, collect data on PLL soak times to reduce bycatch mortality of species such as dusky sharks, and to increase the Agency's understanding of data poor shark stocks to improve future management of these species. NMFS considered public comments and decided to issue the EFP given the need to assess and compare current catch and bycatch rates during normal commercial fishing operations from areas inside and outside the EFC PLL Closed Area.

**DATES:** The Final EA will be available on August 11, 2017.

**ADDRESSES:** A copy of the Final EA may be requested by contacting Atlantic Highly Migratory Species Management Division (F/SF1), NMFS, 1315 East-West Highway, Silver Spring, MD 20910.

**FOR FURTHER INFORMATION CONTACT:** Craig Cockrell at (301) 427-8503 or Rick Pearson at (727) 824-5399.

#### SUPPLEMENTARY INFORMATION:

##### Background

NMFS published a notice of intent to issue EFPs, Scientific Research Permits, Letters of Acknowledgement, and Chartering Permits for Atlantic highly migratory species (HMS) in 2017 (81 FR 80646, November 16, 2016). Although that notice anticipated a variety of such applications, it also stated that occasionally NMFS receives applications for research activities that were not anticipated, or for research that is outside the scope of general scientific sampling and tagging of Atlantic HMS, or rarely, for research that is particularly controversial and that NMFS will provide additional opportunity for public comment, consistent with the regulations at 50 CFR 600.745 if that were to occur.

As discussed in the November 2016 notice of intent to issue EFPs and related permits, issuance of EFPs and related permits are necessary because HMS regulations (*e.g.*, fishing seasons, prohibited species, authorized gear, closed areas, and minimum sizes)

sometimes otherwise prohibit activities that could be undertaken for scientific data collection or other valuable purposes. Thus, under 50 CFR 635.32, and consistent with 50 CFR 600.745, the Director of the Office of Sustainable Fisheries may, through issuance of an EFP, authorize for certain purposes the target or incidental harvest of species managed under a Fishery Management Plan (FMP) or fishery regulations that would otherwise be prohibited. Among the purposes of EFPs are the "conduct of scientific research, the acquisition of information and data, . . . [and] the investigation of bycatch, economic discard and regulatory discard." 50 CFR 635.32(a)(1). These permits exempt permit holders from the specific portions of the regulations (*e.g.*, fishing seasons, prohibited species, authorized gear, closed areas, and minimum sizes) that may otherwise prohibit the collection of HMS for public education, public display, or scientific research. The terms and conditions of individual permits are unique. EFPs and related permits are issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (Magnuson-Stevens Act) (16 U.S.C. 1801 *et seq.*) and/or the Atlantic Tunas Convention Act (ATCA) (16 U.S.C. 971 *et seq.*).

NMFS closed the EFC area to PLL gear year-round in early 2001 (65 FR 47213, August 1, 2000). The closure was implemented to reduce bycatch and incidental catch of overfished and protected species by PLL fishermen who target HMS because there was a noticeable difference in the bycatch of some non-target species (mainly undersized swordfish) between the EFC area and open areas. At the time, Atlantic blue marlin, white marlin, sailfish, West Atlantic bluefin tuna, North Atlantic albacore tuna, and swordfish were overfished with overfishing occurring, and bycatch reduction was a component of rebuilding efforts. In particular, the United States was implementing a 1999 swordfish rebuilding plan, and the closure helped reduce bycatch of undersized swordfish. Several other laws required that NMFS address bycatch in the HMS fisheries, including the Endangered Species Act (ESA), which required reductions in sea turtle bycatch in the PLL fishery. National Standard 9 of the MSA also requires that fishery management plans minimize bycatch and bycatch mortality to the extent practicable.

The closure has been in place for more than 15 years now and, since 2001, a number of changes in stock status and fishery management
