

IRLWWB to determine how best to implement an adaptive management strategy in the medium and long term planning and activities of both the IRLWWB and the Commission in the basin.

Stakeholder Concerns: The views of stakeholders, as heard through the Commission and Study Board engagement and hearings, will be communicated to governments.

Engagement with Indigenous Communities: The Commission endorses the Study Board's recommendations regarding improving engagement and collaboration with Tribes, First Nations, and Métis communities.

Public input is essential to the Commission's rendering of a final decision to proceed with the proposed changes to the management of emergency levels and flows of the Rainy and Namakan Lakes, and to the Commission's perspective on changes to the operations and guidance provided to the Water Levels Committee, engagement with Tribes, First Nations, and Métis, and adaptive management.

The International Joint Commission was established under the Boundary Waters Treaty of 1909 to help the United States and Canada prevent and resolve disputes over the use of the waters the two countries share. Its responsibilities include investigating and reporting on issues of concern when asked by the governments of the two countries.

Under the Rainy Lake Convention, the IJC determines when emergency conditions exist in the Rainy Lake watershed, by reason of high or low water, and adopts measures of control with respect to the dams at Kettle Falls and International Falls-Fort Frances.
