Food and Nutrition Service

Title: Scanner Capability Assessment of SNAP-Authorized Small Retailers (SCANR) Study.

OMB Control Number: 0584—NEW.

Summary of Collection: The SCANR Study will provide FNS with an understanding of the extent to which small retailers participating in the Supplemental Nutrition Assistance Program (SNAP) are able to meet Section 4002 of the Agricultural Act of 2014 (2014 Farm Bill) requirement that all authorized SNAP retailers use scanning technologies at the point of sale (POS) to redeem SNAP benefits. Understanding the number of small retailers that lack scanning systems, the costs of adopting and maintaining scanning systems, and the barriers small retailers face in adopting the technology are key to informing rulemaking for the 2014 Farm Bill requirement.

Need and Use of the Information: This study will result in a comprehensive description of the scanner capability of small SNAP-authorized retailers that will provide FNS with information to inform rulemaking for the 2014 Farm Bill requirement. Cost estimates from the industry interviews and follow-up interviews with retailers and data from secondary sources will be used to estimate store-level costs for adopting scanning systems with different levels of functionality. The cost estimates will account for all costs associated with the purchase, installation, and maintenance of scanning systems. Using the store-level costs and data from the SCANR Survey on the number of small SNAP-authorized retailers without scanning systems, the study will also include the total cost estimate for all small SNAP-authorized retailers to comply with the 2014 Farm Bill requirements. Finally, the study will include a descriptive assessment of the technological and economic barriers small SNAP retailers face in adopting and using scanning systems.

Description of Respondents: Business-for-profit.

Number of Respondents: 1,443.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 370.
