Needs and Uses: In its November 2011 *USF/ICC Transformation Order* (FCC 11-161), the Commission

established the Mobility Fund, which consists of two phases. Mobility Fund Phase I (MF-I) provided one-time universal service support payments to immediately accelerate deployment of mobile broadband services. MF-II will use a reverse auction to provide ongoing universal service support payments to continue to advance deployment of such services. The Commission adopted the rules and framework for MF-I in the *USF/ICC Transformation Order*, and sought comment in an accompanying further notice of proposed rulemaking on the proposed framework for MF-II. In its February 2017 *Mobility Fund II Report and Order (MF-II Report and Order)* (FCC 17-11), the FCC adopted the rules and framework for moving forward expeditiously with the MF-II auction. Among other things, the Commission stated in the *MF-II Report and Order* that, prior to the auction, it would establish a map of areas presumptively eligible for MF-II support based on the most recently available FCC Form 477 mobile wireless coverage data, and provide a limited timeframe for parties to challenge those initial determinations during the pre-auction process.

The Commission received several petitions for reconsideration of the *MF-II Report and Order*, including one asking it to reconsider the decision to use existing FCC Form 477 data as the basis for determining the map of areas presumptively eligible for MF-II support, and offering an industry consensus proposal asking the Commission to undertake a new, one-time data collection with specified data parameters tailored to MF-II to determine the areas in which there is deployment of qualified Long Term Evolution (LTE). On August 4, 2017, the Commission released an *Order on Reconsideration and Second Report and Order* (FCC 17-102) in which it, among other things, reconsidered its earlier decision to use FCC Form 477 data to compile the map of areas presumptively eligible for MF-II support. The Commission decided it would instead conduct a new, one-time data collection of 4G LTE coverage data that will be used for this purpose, concluding that for purposes of implementing MF-II expeditiously, this approach will provide the Commission and interested parties with the best available starting point for the challenge process and should result in fewer and more narrowly-focused challenges regarding representations of coverage.

Only those providers that have previously reported 4G LTE coverage in FCC Form 477 and have qualified 4G LTE coverage (defined by download
