SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its
continuing effort to reduce paperwork
and respondent (*i.e.*, employer) burden,
conducts a preclearance consultation
program to provide the public with an
opportunity to comment on proposed
and continuing information collection
requirements in accord with the
Paperwork Reduction Act of 1995 (44
U.S.C. 3506(c)(2)(A)). This program
ensures that information is in the
desired format, reporting burden (time
and costs) is minimal, collection
instruments are clearly understood, and
OSHA's estimate of the information
collection burden is accurate. The
Occupational Safety and Health Act of
1970 (the OSH Act) (29 U.S.C. 651 *et*

seq.) authorizes information collection
by employers as necessary or
appropriate for enforcement of the OSH
Act or for developing information
regarding the causes and prevention of
occupational injuries, illnesses, and
accidents (29 U.S.C. 657). The OSH Act
also requires that OSHA obtain such
information with minimum burden
upon employers, especially those
operating small businesses, and to
reduce to the maximum extent feasible
unnecessary duplication of effort in
obtaining information (29 U.S.C. 657).

The Grain Handling Facilities
Standard specifies a number of
paperwork requirements. The following
sections describe who uses the
information collected under each
requirement as well as how they use it.
The purpose of the requirements is to
reduce employees' risk of death or
serious injury while working in grain
handling facilities.

Paragraph (d) of the Standard requires
the employer to develop and implement
an emergency action plan so that
employees will be aware of the
appropriate actions to take in the event
of an emergency.

Paragraph (e)(1) requires that
employers provide training to
employees at least annually and when
changes in job assignment will expose
them to new hazards. Paragraph (f)(1)
requires the employer to issue a permit
for all hot work. Under paragraph (f)(2)
the permit shall certify that the
requirements contained in 1910.272(a)
have been implemented prior to
beginning the hot work operations and
shall be kept on file until completion of
the hot work operation.

Paragraph (g)(1)(i) requires the
employer to issue a permit for entering
bins, silos, or tanks unless the employer
or the employer's representative is
present during the entire operation. The
permit shall certify that the precautions
contained in paragraph (g) have been
implemented prior to employees
entering bins, silos or tanks and shall be
kept on file until completion of the
entry operations.

Paragraph (g)(1)(ii) requires that the
employer de-energize, disconnect,
lockout and tag, block off or otherwise
prevent operation of all mechanical,
electrical, hydraulic, and pneumatic
equipment which presents a danger to
employees inside grain storage
structures.

Paragraphs (i)(1) and (i)(2) require the
employer to inform contractors
performing work at the grain handling
facility of known potential fire and
explosion hazards related to the
contractor's work and work area, and to
