Agenda

The Advisory Panel will review analyses prepared for Amendment 8 Draft Environmental Impact Statement (DEIS). Measures include alternative Acceptable Biological Catch (ABC) control rules and measures to address potential localized depletion and user conflicts in the herring fishery. The panel may identify preferred alternatives for the Committee to consider the following day. They will also discuss recommendations for the Committee to consider for 2018 work priorities for the Herring Fishery Management Plan (FMP). The Council is scheduled to have an initial discussion of potential 2018 priorities at the September Council meeting. The panel will discuss if there are any regulations in the Herring FMP that could be eliminated, improved, or streamlined. Several recent Executive Orders have been issued about streamlining current regulations, and NOAA is seeking public input on the efficiency and effectiveness of current regulations and whether they can be improved. Other business will be discussed as necessary.

Although other non-emergency issues not on the agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Actions will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.
