II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "Licensing Requirements for Land Disposal of Radioactive Waste." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on May 10, 2017 (82 FR 21834).

1. *The title of the information collection*: 10 CFR part 61—Licensing Requirements for Land Disposal of Radioactive Waste.
2. *OMB approval number*: 3150-0135.
3. *Type of submission*: Extension.
4. *The form number if applicable*: Not applicable.

5. *How often the collection is required or requested*: Applications for licenses are submitted annually and as other events require.

6. *Who will be required or asked to respond*: Applicants for and holders of an NRC license (to include Agreement State licensees) for land disposal of low-level radioactive waste.

7. *The estimated number of annual responses*: 16 (12 reporting responses + 4 recordkeepers).

8. *The estimated number of annual respondents*: 4.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request*: 5,372 hours (56 hours reporting + 5,316 hours recordkeeping).

10. *Abstract*: Part 61 of title 10 of the *Code of Federal Regulations* (10 CFR), establishes the procedures, criteria, and license terms and conditions for the land disposal of low-level radioactive waste. The reporting and recordkeeping requirements are mandatory and, in the case of application submittals, are required to obtain a benefit. The information collected in the applications, reports, and records is evaluated by the NRC to ensure that the licensee's or applicant's disposal facility, equipment, organization, training, experience, procedures, and plans provide an adequate level of protection of public health and safety, common defense and security, and the environment.

Dated at Rockville, Maryland, this 22nd day of August, 2017.

For the Nuclear Regulatory Commission.

David Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.
