SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Producer Price Index (PPI) Survey. The PPI is a measure of price movements as an indicator of inflationary trends for inventory valuation and as a measure of purchasing power of the dollar at the primary market level. The PPI is also used in market and economic research and as a basis for escalation in long-term contracts and purchase agreements. This information collection accumulates data for the ongoing monthly publication of the PPI family of indexes. The BLS Authorizing Statute authorizes this information collection. See 29 U.S.C. 2.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1220-0008.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on September 30, 2017. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the *Federal Register* on May 12, 2017 (82 FR 22163).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the *Federal Register*. In order to help ensure appropriate consideration, comments should mention OMB Control Number

1220-0008. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and

SUPPLEMENTARY INFORMATION:

I. Background

The Occupational Safety and Health Act (OSH Act) and 29 CFR part 1904 prescribe that certain employers maintain records of job-related injuries and illnesses. The injury and illness records are intended to have multiple purposes. One purpose is to provide data needed by OSHA to carry out enforcement and intervention activities to provide workers a safe and healthful work environment. The data are also needed by the Bureau of Labor Statistics to report on the number and rate of occupational injuries and illnesses in the country. The data also provides information to employers and workers of the kinds of injuries and illnesses occurring in the workplace and their related hazards. Increased employer awareness should result in the identification and voluntary correction of hazardous workplace conditions. Likewise, workers who are provided information on injuries and illnesses will be more likely to follow safe work practices and report workplace hazards. This would generally raise the overall level of safety and health in the workplace. OSHA currently has approval from the Office of Management and Budget (OMB) for the information collection requirements contained in 29 CFR part 1904. That approval will expire on January 31, 2018, unless OSHA applies for an extension of the OMB approval. This notice initiates the process for OSHA to request an extension of the current OMB approval. This notice also solicits public comments on OSHA's existing paperwork burden estimates from those interested parties and seeks public responses to several questions related to the development of OSHA's estimates. Interested parties are requested to review OSHA's estimates, which are based upon the most current data

available, and to comment on their accuracy or appropriateness in today's workplace situation.

II. Current Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in 29 CFR part 1904, Recording and Reporting Occupational Injuries and Illnesses. The Agency is requesting to reduce its current burden hour estimate associated with this Standard from 2,524,458 to 2,253,549 hours for a total reduction of 270,909 hours. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: 29 CFR part 1904, Recording and Reporting Occupational Injuries and Illnesses.

OMB Control Number: 1218-0176.

Affected Public: Business or other for-profits; farms; not-for-profit institutions; State and local government.

Number of Respondents: 1,002,912.

Frequency: On occasion.

Average Time per Response: Various.

Estimated Total Burden Hours: 2,253,549.

Estimated Cost (Operation and Maintenance): \$123,583,587.
